

Schröder
Experts in lightability™

Smart and sustainable lighting solutions

For safe, pleasant and connected environments

Lightability™

a spirit, a mission, our beliefs

Schröder

Experts in lightability™

With a century-long tradition of innovation and entrepreneurial spirit, Schröder pushes the limits of smart lighting. We are broadening our expertise to not only light the urban environment but also provide more services to interact with public spaces and the people in them.

We **help** local authorities establish open, interoperable platforms and provide easy-to-integrate infrastructure that not only improves the quality of life in cities but also the quality of democracy.

We **care** about taxpayers' money and provide the best cost/benefit for citizens. Hence we encourage more effective use of public finances by integrating public policies and operational cost reductions through new technologies.

We **stimulate** active, open and inclusive participation of actors belonging to a city's innovation eco-system, to foster the social, environmental and economic development of businesses and citizens.

We **strive** to create inclusive environments that stimulate accessibility for people with disabilities, encourage gender and ethnic equity, and bring new opportunities to vulnerable places in cities.

We **encourage** and implement training initiatives for citizens, planners and public managers on lighting & smarter cities in an open, transparent and non-biased way.

SMART POLE

Your partner in sustainability

Schröder has developed a cohesive, company-wide sustainability strategy called **"Together for our Future"**. This commitment is structured around three axes encompassing the relevant prioritised **UN Sustainable Development Goals (SDGs)**.

Sustainability is embedded into our strategy, structure, processes and culture. At Schröder, we collaborate closely with our customers to develop robust and long-term solutions to meet the challenges they face, while adding value with a positive, lasting impact on society and the environment.

PLANET

Being responsible for the planet by reducing our own and our customers' environmental impact.

COMMUNITY

Being responsible for the community by having a resolutely positive impact on society through our solutions.

PEOPLE

Being responsible for our staff members by developing human growth through diversity and respect for human rights.

**SUSTAINABLE
DEVELOPMENT
GOALS**

«Our role as market leader motivates us to take part in the global battle against climate change and contribute to respectful economic development. We help communities face their biggest challenges, making the world more sustainable.»

Werner de Wolf
CEO – Schröder

A company
strongly committed
to sustainability

EcoVadis evaluates more than 85,000 organisations in over 160 countries and in over 200 industries every year. **Based on 21 criteria, the rating assesses a company's performance** in four categories: Environment, Labour and Human Rights, Ethics and Sustainable Procurement.

The EcoVadis gold rating acknowledges the efforts being made every day by every single Schröder employee to enable a better and more sustainable world.

More information:
www.ecovadis.com

YOUR PARTNER IN SUSTAINABILITY

Being responsible
for the planet

Manufacturing according to the highest environmental standards

All Schröder factories are certified ISO 14001:2015 which recognises their efforts for their environmental management system.

For each factory, a continuous improvement plan for resource efficiency and waste management is put into action by the quality manager.

More information:

www.iso.org

Transparency throughout the complete product life cycle

To provide our customers with clear information on the environmental impact of each luminaire, Schröder relies on **a product life cycle analysis tool** (Instant LCA), developed in collaboration with an independent agency (in accordance with the principles of ISO 14040:2006). The results are available in the **Product Environmental Profile** (PEP) documents.

They summarise the luminaire's life cycle assessment, by examining its environmental impact throughout its life cycle, from raw material extraction to end of life.

The PEP documents are available upon request to all customers to help them demonstrate their regulatory compliance and commitment to minimising their environmental footprint.

Building a circular ecosystem

Schröder takes the circular economy into account, right from the outset. From the concept phase, design guidelines not only consider the production and environmental impact of our luminaires. They also facilitate removing components and increasing the standardisation of parts and the materials' separability once their working life is over.

The **Schröder Circle Light Label** designates products that are optimised for a circular economy without compromising on quality.

We assess our luminaires to evaluate their potential circularity through 12 objective criteria in 5 categories:

- ✓ Performance
- ✓ Maintenance
- ✓ Refurbishment
- ✓ Non-destructive disassembly
- ✓ Recycling

The **Schröder Smart Label** allows installers and infrastructure managers to access essential luminaire information by scanning a QR code. It enables project specific details to be added during installation and facilitates communication between installers and city managers. Troubleshooting assistance and spare parts ordering are also available via the Smart Label, ensuring reliable information on luminaires, anytime, anywhere.

- ✓ Provides instant access to luminaire information via QR code scanning (works online and offline)
- ✓ Provides the ability to add key information during installation
- ✓ Facilitates interaction between installers and city managers
- ✓ Provides support for repairs and parts ordering

The **Schröder Circle Light App** is the practical tool for on-site programming and quick one-for-one driver replacement, to refurbish installed luminaires and extend their life while maintaining the desired operating mode.

It helps lighting operators and installers to:

- ✓ Access all relevant luminaire information by scanning a QR code
- ✓ Program luminaire settings on site and reduce inventory complexity
- ✓ Capture asset installation data
- ✓ View installed luminaires on a map interface
- ✓ Read diagnostic information and operating history on site
- ✓ Extend luminaire life while preserving existing settings

Easily upgrade your existing installations with the **Schröder CIRCLE LED BASE** retrofit kits, sustainable solutions that extend the life of your luminaires. They help you reduce waste, comply with light pollution regulations, minimise maintenance and save energy. With the CIRCLE LED BASE, you can meet the principles of a circular economy without the need for new wiring or changes to your existing lighting infrastructure.

- ✓ **Easy to upgrade:** adapts to existing luminaire frames for LED conversion or replacement.
- ✓ **Easy installation:** plug-and-play design for quick and convenient installation.
- ✓ **Extended infrastructure life:** replace light sources for improved efficiency, preserving existing infrastructure.
- ✓ **Enhanced performance:** superior features including glare control, flicker control, extended life, light pollution reduction and improved safety.

Solutions for maximised energy efficiency

CUSTOM FACTORY DRIVER SETTINGS

Intelligent luminaire drivers can be programmed in the factory with complex dimming profiles. The period between switching on and switching off is used to activate the **preset dimming profile**. The customised dimming system generates maximum energy savings while respecting the required lighting levels and uniformity throughout the night.

SENSORS FOR AUTONOMOUS DYNAMIC SCENARIOS

Photoelectric sensors switch on the luminaires exactly when natural light becomes insufficient (cloudy day, night fall, etc.) so as to provide safety and comfort in the public space.

In places with little nocturnal activity, lighting can be dimmed to a minimum most of the time. By using **motion sensors such as PIR sensors or radars** (taking into account speed and direction criteria), levels can be raised as soon as a pedestrian or a vehicle is detected in the area.

ADVANCED REMOTE CONTROL SYSTEMS

With its user-friendly remote control systems for intelligent lighting, Schröder integrates advanced features for **programming the most efficient dimming profiles based on endless variables** (calendar days, special events, seasons, etc.) while providing safety, comfort and a sense of well-being for people.

Schröder can integrate smart lighting applications such as the ability to adapt the colour of the light or build dynamic lighting scenarios through PIR sensors or radars. As they offer **complete interoperability**, Schröder control systems can manage controllers/sensors and control luminaires from other manufacturers.

Towards environmental excellence of the built environment

We encourage our customers to think strategically about sustainability, co-creating solutions that improve their performance against a wide variety of sustainability criteria. By drawing on our long experience in designing high-performance, low-energy spaces, we can deliver lighting solutions with all the necessary documentation to **help our customers achieve BREEAM certification**.

BREEAM (Building Research Establishment Environmental Assessment Method) is a certification based on the leading sustainability assessment method for buildings, communities and infrastructure projects.

Using Schröder solutions, up to 17 credits (counting for 6 of the 10 criteria considered) can be achieved in the BREEAM assessment.

Tackling climate change with renewable energy

SOLAR SYSTEMS TO DECARBONISE LIGHTING

With its solar-powered systems, Schréder helps cities and municipalities decarbonise their lighting. The combination of the best technology for harvesting, storing and releasing solar energy with the latest lighting concepts guarantees the best use of renewable energy in the fight against climate change.

SIGNIFICANT SAVINGS COMPARED TO GRID LIGHTING

LED-based solar street lighting solutions are becoming more accessible and cost-effective, driving their adoption in various regions. They provide cities and municipalities with various types of savings.

Energy savings

No electricity bills. Solar systems operate autonomously, using only renewable energy from the sun.

Installation savings

No need for electrical infrastructure. Installation costs are much lower than grid-connected lighting, especially in remote areas or areas with difficult terrain.

Maintenance savings

No reliance on power transmission or distribution infrastructure. There are fewer components to wear out or require maintenance. The solar panels are self-cleaning.

Environmental savings

No heavy infrastructure work to install. No greenhouse gas emissions or other environmental impact during operation.

A SUSTAINABLE SOLUTION FOR MANY APPLICATIONS

Solar lighting has become a credible alternative to grid-powered lighting for a wide range of typical outdoor applications: from roads to bike paths, car parks to campuses, recreational sports facilities to business facilities, solar lighting may be the best solution for your project!

SOLAR-ENABLED SCHRÉDER LUMINAIRES SETTING THE INDUSTRY STANDARD

The IZYLUM, TECEO GEN2 and CITEA NG2 ranges now have specific solar versions as part of the Schröder EKINOX powered by Sunna Design range. With up to 180 lm/W, these optimised solutions make the most of every available watt of solar energy to create safe and comfortable conditions for end users.

Being responsible for the community

The right light where, when and how it is needed

The art of smart lighting consists of putting the kind of light you request where you need it, and taking it away from where you don't require it and when you don't want it. Schröder is your partner for **maximising the advantages of lighting while taking care of the environment** and improving your operational benefit.

With our modern and versatile technologies enabling a **"Dim It, Aim It, Tone It, Change It"** philosophy, we offers our customers complete flexibility to modulate light according to any environmental challenge.

A guarantee of the best photometric solution

As pioneers in lighting technology, our lighting solutions deliver the right light in the right place.

We have developed **numerous photometric engines** over the years to provide **the best solution for every project** in terms of performance, comfort, desired outcome and return on investment. We constantly strive to innovate and develop solutions that are as positive for people as they are sustainable for the environment.

We combine our technical and photometrical know-how to **meet the most demanding lighting standards**.

PureNight: dark sky, bright ideas

PURE

With its PureNight concept based on high-end lighting designs with state-of-the-art photometrical platforms and aiming accessories, Schröder offers the ultimate solution for bringing the night sky back without switching off cities. With Schröder PureNight solutions, you can **direct the light only where it is wanted and needed.**

The right colour temperature at any time

**FLEXI
WHITE**

To choose is to forsake. When it comes to deciding which colour temperature you will opt for, it is never a happy moment. You know that a colder white light optimises performance while a warmer one is more preferable to people and animal natural cycles. What if you didn't have to choose? The Schröder FlexiWhite solution offers you the freedom to use the right colour temperature at any time.

Whether it relies on pre-programmed scenarios, works with the our remote control systems, uses sensors or a mix of all three, the FlexiWhite solution offers you the flexibility to provide **the right level with the right colour temperature at the right place and the right time.**

CASE #1

Preservation of nature, promotion of active mobility

Environment: Bike/pedestrian path
FlexiWhite solution: Amber as default, 3000K upon detection.

AMBER

Nature-friendly, minimal safety lighting

3000K

people detection, maximised safety and comfort (high visibility)

CASE #2

Attractiveness, ambiance and circadian rhythm

Environment: City centre
FlexiWhite solution: 2200K, 3000K and everything in between.

3000K – 30lux

Early evening/early morning
Stimulating atmosphere

2700K – 20lux

Evening/early night
Quieter ambiance

2200K – 5lux

Night
Completely calm mood

Complying with the strictest environmental regulations

Each country, if not each region, has its own environmental regulations. They can be more or less strict and focus on certain specific criteria. All of them are largely inspired by the **EU green public procurement policy** for road lighting, issued in 2019.

Regulation strives to:

- ✓ Limit ULOR to max. 1%;
- ✓ Reduce glare: at least 95% of the light emission is confined to angles below 14.5 degrees from the horizontal;
- ✓ Restrict the emission of blue light with CCT <3000K;
- ✓ Restrain the amount of light to less than 35lm/m²;
- ✓ Prohibit intrusive lighting towards dwellings and any kind of lighting of waterways and the sea.

The PureNight certification software developed by Schröder guarantees that **your lighting solution satisfies environmental laws and requirements**. Schröder has its own certified laboratory and is also endorsed by numerous independent certification bodies.

Preserving the ecosystem

Fauna and flora can suffer from high light intensity, the colour spectrum (blue light) and excessive lighting over time. **Only experts can minimise the disturbance to the different species of fish, insects and endangered animals.**

Trees and hedgerows are natural environments for bats, while rivers and canals are also important for foraging. Certain species of bat are very sensitive to light.

Light pollution, i.e. excessive lighting and uncontrolled light spill, contributes significantly to insect mortality.

The **Schröder PureNight photometry meets dark-sky specifications** (0% ULOR and 2200K) and take advantage of accessories (backlight control and glare limiter) to focus the light only where it is needed.

Schröder's FlexiWhite solution combines dimming and colour temperature changes according to fixed or on-demand scenarios with sensors for **safe and environmentally-friendly lighting**.

The IP66 design of our luminaires prevent insects from entering and being captured in the housing. With low driving current, the outer surface of the housing maintains a low temperature, preventing insects from dying from the heat.

With the right luminaire design, photometry, colour temperature and dimming scenario, Schröder protects wildlife and contributes to the preservation of the ecosystem.

YOUR PARTNER IN SUSTAINABILITY

Supporting communities towards active mobility

SOLUTIONS FOR SAFE PEDESTRIAN CROSSINGS

Effective lighting for pedestrian crossings needs to do three things. Firstly, ensure the crossing is highly visible and distinguishable from the surrounding area. Next, it needs to give drivers clear visibility of pedestrians approaching and using the crossing. And finally, lighting should minimise glare for drivers.

Schröder has a long history of developing specific optics to light pedestrian crossings to **ensure safety for both motorists and pedestrians and help them share the public space** in a safer manner.

It comes down to providing a lighting solution that has a high vertical illuminance on pedestrians, so they are clearly visible from the driver's position, and horizontal illuminance on the pedestrian crossing for people crossing the road.

Of course, our solutions save energy, are sustainably manufactured and look aesthetically pleasing, as well.

SMART LIGHTING, SMART BIKING

We are living in the age of the cycle revival. Electric bikes also are becoming more affordable, meaning that this trend is very likely to continue. But getting a bike is only part of the story: **safe, attractive routes and user-friendly infrastructure** play a huge role in encouraging people out of their cars.

When it comes to switching to cycling, feeling safe is just as important as being safe. Lighting plays a huge role in this, and it's something that we've quietly

become experts in over the years at Schröder, helping cities from Rio to Budapest to not just accommodate, but actively encourage, cycling.

Our smart lighting solutions for bicycle paths ensure that we provide the right light at all times in the right places. They **minimise energy consumption, respect wildlife, facilitate network expansion, optimise maintenance operations** and asset management while offering the best user experience.

Being responsible with people

Valuing difference, being inclusive, and embracing diversity

At Schröder, every employee is valued for her or his skill set. We actively look for and choose employees based on their experience and the value they bring to the company. This concept is underlined in our **Code of Conduct**.

The diversity of the staff, in all its forms (skills, experience, age, gender, culture, etc.), is **a source of renewal, innovation and creativity**. In line with the UN's goals, we decided to focus our efforts primarily on gender diversity and equality, as this is still an on-going concern in society as a whole.

Protecting human rights

Schröder has adopted the Responsible Business Alliance (RBA) Code of Conduct as its standard on human rights. Our goal is to **protect human rights directly and indirectly** by ensuring that Schröder's entities and their supply chain are safe and that workers are treated with respect and dignity.

We require all our suppliers to confirm adherence and compliance with the RBA standard.

More info: www.responsiblebusiness.org

Training and education

Schröder has developed its own internal training academy called SKILL, which stands for Sharing Knowledge in Light and Lighting. SKILL's mission is to **increase Schröder employees' and stakeholders' competencies to successfully face changes** in the lighting market such as smart lighting and new control systems. SKILL also develops e-learning and online courses, both for Schröder employees and customers.

Creating your **custom solution**

While our standard lighting solutions are engineered for performance and designed for customer satisfaction, we regularly receive requests for a bespoke touch or a more unique solution. Schröder STUDIO comes into play to deliver a bespoke solution that fulfils customer expectations and environmental specifications.

From stock... or not!

Customer feedback plays a critical role in our innovative design process and we are continuously extending and improving our ranges. Yet, sometimes, our customers face specific technical constraints.

Schröder STUDIO - our in-house custom design service - takes up the challenge, **engineering dedicated solutions** that match the same high quality as our standard luminaires.

Schröder STUDIO tweaks and optimises features **to meet our customers' own technical preferences**. These solutions, which meet specific individual requests, are designed to enable mass production, if needed.

Pairi Daiza - BELGIUM

Full-scope service

Our efficient, transparent process delivers **quality custom products** in a short time. It all starts with a feasibility study and a cost assessment.

The design phase explores every possible way of delivering the result. We work with multiple software packages to **provide the calculations and visuals to facilitate validation**. To ensure that the final product will meet expectations at every level, we use **rapid prototyping to test the functionalities**.

This allows stakeholders to explore the fine details while enabling us to propose improvements for the final design.

Vienna - AUSTRIA

Paris - FRANCE

STUDIO

Customisation, retrofitting or re-creation

The expertise of Schröder STUDIO also includes retrofitting existing luminaires or the complete re-creation of heritage lanterns with modern and connected LED technology.

Whether customers are looking for lanterns for castle grounds, luminaires for an eastern style bazaar or a customised fixture, we can create **tailor-made solutions** to suit their specific needs.

With the support of our Kandeláber team in Hungary, we transform their ideas into reality, even if they are just based on a few sketches.

Put your thoughts on paper, send us your drawings or an old photo and we will **design and develop your concept**.

Budapest - HUNGARY

Schröder STUDIO adapts, retrofits or re-creates luminaires according to your technical preferences, with the same quality requirements we apply to our standard portfolio.

The opportunity to be unique

While Schröder STUDIO is mainly about developing the bespoke luminaire that you need, Schröder SIGNATURE is more creative, delivering iconic solutions to light your city. Our team of experts can design a luminaire, lighting column or any other lighting structure to bring your ideas to life, reflecting your unique character and enhancing your space.

We work side by side with you, ideating and brainstorming to solve any complex challenges. We explore the different avenues and propose a number of different yet equally viable concepts.

We can advise not only on the aesthetic result but also on the choice of materials, mounting and cabling.

We provide different visuals to interact with our customers throughout the project.

By creating 3D models, we resolve the final mechanical details and can provide visuals of the luminaire in its future location.

With Schröder SIGNATURE, customers observe the fascinating evolution **from a simple drawing to their own wonderful and unique lighting solution.**

VisioLum **3D**

VisioLum **AR**

Experience your lighting solution **before implementing it**

Visualisation and immersive technology bring value to every project. Innovative tools such as augmented reality are enablers for the experience of design and bringing solutions to life vividly, with a sense of scale and presence. Put the Schröder VisioLum applications in your pocket and enter a new dimension!

With the Schröder VisioLum 3D and AR mobile applications, try out your own lighting solution in the most effective, easiest and fun way possible.

VisioLum 3D: evaluate, configure and visualise

Schröder VisioLum 3D lets architects, lighting designers and town planners **easily and quickly customise their own luminaire** by testing out all the different designs, finishes and accessories. They can then combine the luminaire with a bracket and pole to discover how their own unique lighting solution could enhance their town or city both by day and by night. With an intuitive interface, you can explore endless possibilities to **find the ideal solution with no need for mock-ups and 3D renderings**, which can take

up a lot of time. You can zoom in and out and do a complete 360° turn to visualise the ensemble from all points of view.

The App also enables you to save your choices and download the 3D files or a PDF with a summary of the configurations to share with colleagues and potential customers.

The Schröder VisioLum 3D application is constantly expanding the possibilities with new products for ever more personalised solutions.

VisioLum AR: immerse yourself in reality 2.0

Augmented reality **helps people view designs in context at very early stages** – allowing the architect, contractor and customer to have the same spatial understanding of the environment.

With Schröder VisioLum AR, you can **integrate a customised solution from VisioLum 3D into an urban environment** and then duplicate the number of lighting ensembles to see the overall effect, both in day or night views.

SMART & CONNECTED

“ Solutions providing benefits beyond lighting ”

01 011

Schröder

“Schröder Hyperion builds on Schröder’s century-long experience, knowledge and engineering to support cities with a specialised portfolio of relevant smart city solutions.

In addition, Schröder Hyperion works with partners across the world, to complement today’s products and create additional opportunities for cities.”

NICOLAS KEUTGEN

Chief Innovation Officer at Schröder

Innovation and inspiration for smarter cities

**With Schröder Hyperion,
Schröder is shaping the evolution of smart cities.**

More than 80 experts in cloud computing, cybersecurity, machine learning, IoT and data analysis are working closely with customers to unlock the potential of urban infrastructures to address significant society challenges.

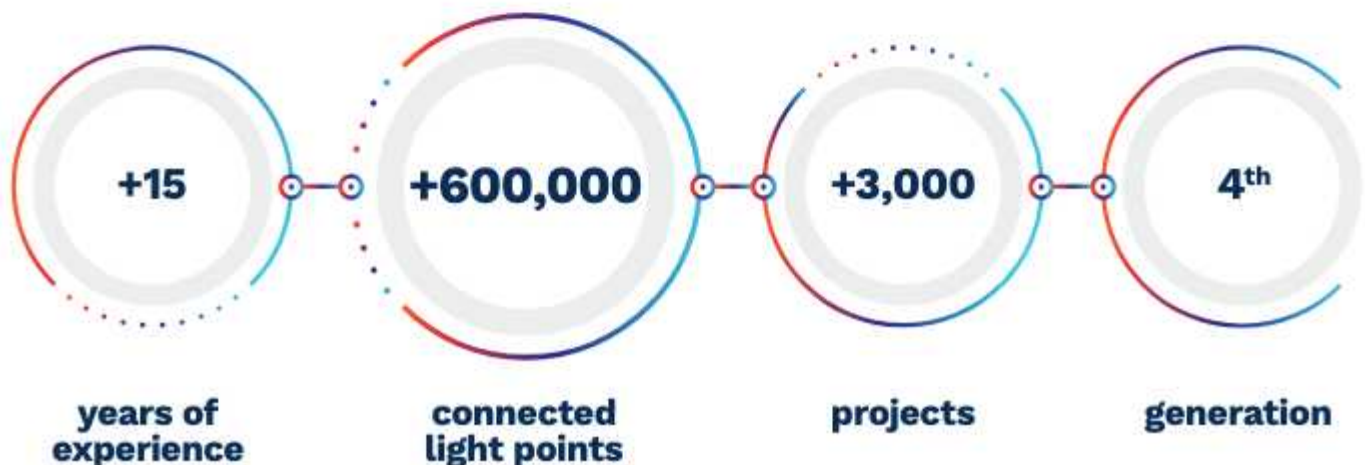

Located at the Nova School of Business and Economics (Nova SBE) in Carcavelos (Lisbon region), a brand new university campus, Schröder Hyperion aims to plan urban spaces, repurpose existing infrastructure and develop luminaire-based digital systems.

Schröder Hyperion provides practical information, training and solutions, to facilitate the transition to smarter and more sustainable cities.

This centre of excellence is strategically based in the Lisbon area to take full advantage

of the strong tech talent. The city boasts a remarkably high number of qualified engineers per capita and so Schröder Hyperion seeks to leverage the thriving international tech ecosystem through collaboration and the implementation of research initiatives.

Schröder **smart** and **connected** solutions

EXEDRA

Your city
as smart
as you want

Schröder EXEDRA is the most advanced lighting management system on the market for controlling, monitoring and analysing streetlights in a user-friendly way. It is the right tool for aligning value with short- and mid-term targets while sustaining a long-term vision.

EXEDRA

KEY ADVANTAGES

- > Remote control to maximise energy/maintenance savings while providing the right light to keep people safe and comfortable at any time in outdoor environments
- > Technology-agnostic platform: shared and open technologies to unlock complete interoperability
- > Plug-and-play solution
- > Intuitive and comprehensive City Management System for smart device management
- > Fully customisable user interface with personalised dashboards
- > Data collection, aggregation and analysis for decision-making based on practical visualisation and reports

THE SKY IS THE LIMIT

With EXEDRA, Schröder has developed **a futureproof platform** that combines the constant need to address new challenges and to evolve with technology. Schröder relies on open standards and protocols to design an architecture able to interact seamlessly with third-party software and hardware solutions.

AT THE TOP OF YOUR GAME

Schröder EXEDRA includes **all the advanced features needed** for smart device management, real-time and scheduled control, dynamic and automated lighting scenarios, maintenance and field operation planning, energy consumption management and third-party connected hardware integration.

SIMPLICITY, THE ULTIMATE SOPHISTICATION

Schröder EXEDRA is **a plug-and-play solution** that enables quick and easy deployment of a connected lighting network. An intelligent **automated commissioning** process recognises, verifies and retrieves luminaire data in the user interface.

GREAT INSIGHTS, GREAT DECISIONS

Data is gold. Schröder EXEDRA provides this with all the clarity managers need to drive decisions. The platform collects massive amounts of data from terminal devices and aggregates, analyses and intuitively displays them to **help end-users take the right actions**.

PROTECTED ON EVERY SIDE

Schröder EXEDRA provides **state-of-the-art data security** with encryption, hashing, tokenisation, and key management practices that protect data across the whole system and its associated services.

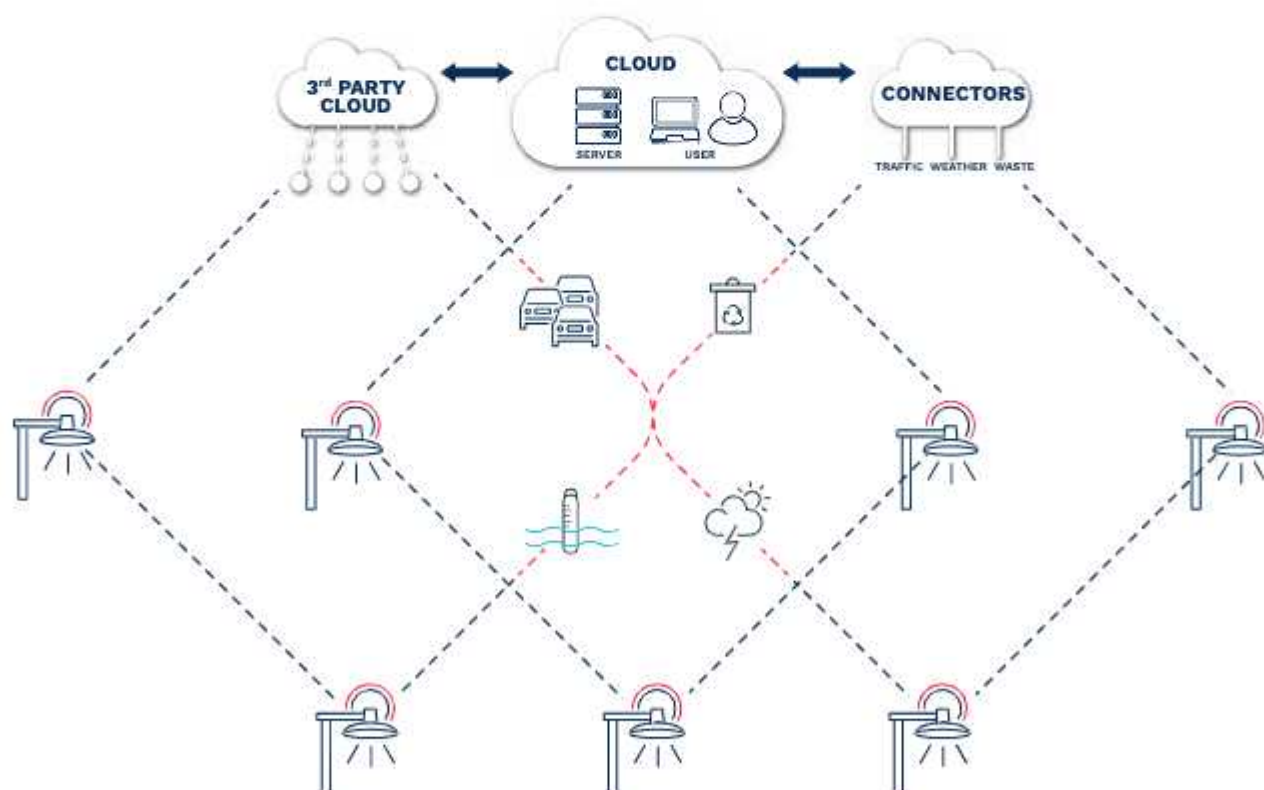

Standardisation to enable custom IoT solutions

The Schröder EXEDRA system architecture is designed to interact with other software and hardware solutions seamlessly. How is this possible? Unlike proprietary systems that prevent interoperability and generate vendor lock-in or expensive proprietary integrations, Schröder EXEDRA is **a complete solution based on open standards and protocols.**

Schröder plays a key role in driving standardisation with alliances and partners such as uCIFI, TalQ or D4i. Our joint commitment is to provide **solutions designed for vertical and horizontal IoT integration.** From the body (hardware) to the language (data model) and the intelligence (algorithms), the complete Schröder EXEDRA system relies on shared and open technologies.

This interoperable platform ensures that customers can connect existing or third-party systems/ devices to Schröder EXEDRA and even means that we are open to working with our competitors.

EXEDRA

Our **ecosystem partners** for technology-agnostic solutions

The end of proprietary wireless communication networks for smart cities and utilities

The uCIFI Alliance is open to any industrial company, consulting firm, end customer, public authority, utility and other entity, that is committed to developing open, non-proprietary solutions to unlock the smart city and smart energy markets.

www.ucifi.com

The global smart city protocol

The TALQ Consortium aims to define a globally accepted smart city protocol for central management software, to configure, control, command and monitor heterogeneous smart city device networks.

www.talq-consortium.org

Interoperability of luminaires, sensors and/or communication nodes

The Zhaga consortium joined forces with the DiA to produce a single Zhaga-D4i certification that covers all the critical features including mechanical fit, digital communication, data reporting and power requirements within a single luminaire, ensuring plug-and-play interoperability of luminaires (drivers) and peripherals such as connectivity nodes.

www.zhagastandard.org

Open, flexible and secure cloud computing services

Microsoft Azure is an ever-expanding set of cloud services provided with the highest levels of trust, transparency, standards conformance and regulatory compliance. Microsoft Azure offers the freedom to build, manage, and deploy applications on a massive, global network using customers' favourite tools and frameworks.

www.azure.microsoft.com

FULLY CONFIGURABLE DASHBOARD

Customise your working environment: add, move, resize and organise widgets for each and every stakeholder's personal dashboard.

INTEGRATED INVENTORY AND DEVICE MANAGEMENT

Retrieve, create, edit or delete luminaires, cabinet controllers, meters, electric cables, sensors and more.

DEVICE STATUS AND REAL-TIME INSIGHT/CONTROL

Stay connected to your network. Navigate on a map view to check key performance indicators and device statuses, and manage them when needed.

LIGHTING SCHEDULES

Program your lighting. Create and edit your dimming profiles based on endless variables (calendar days, special occasions, season, etc.). Assign these rules to configurable groups of luminaires.

DYNAMIC LIGHTING

Maximise your benefits by associating sensors with groups of luminaires to trigger pre-defined lighting scenarios.

REPORTS, ALARMS AND DATA ANALYTICS

Anticipate and react in real time. Configure warning messages, get useful insights using the reports. Take advantage of aggregated data to make informed decisions.

ENERGY CONSUMPTION MANAGEMENT

Keep bills under control. Monitor, meter, compare. Schréder EXEDRA provides all the relevant features to help you improve energy efficiency.

TICKETING SYSTEM

Organise field operations through a fully integrated ticketing system that will help you optimise your asset management and maintenance.

AUTOMATION

Take advantage of the Schröder EXEDRA automation centre to easily customise advanced sequences of automated actions based on the conditions and rules you have defined.

USER MANAGEMENT

Distribute roles and rights to all project stakeholders according to their missions and responsibilities.

MULTI-TENANT

Configure and manage different zones independently. Thanks to Schröder EXEDRA multi-tenant architecture, contractors, utilities or big cities are able to segregate areas.

APPLICATION SOLUTION

Connect different types of hardware from various manufacturers to the EXEDRA UI. This applies to both light control and other applications: environmental monitoring, smart water, smart grid, smart parking, smart waste and more.

**Click for more
information**

Anytime, anywhere,
connect to your street
lighting with the
Schröder EXEDRA App

The Schröder EXEDRA mobile application offers the essential functionalities of the desktop platform, to accompany all types of operator on site in their daily effort to maximise the potential of connected lighting.

- > Commission your connected luminaires quickly and easily
- > Search for any connected luminaire, using geolocation, a unique ID or a QR code
- > Manage your assets (add/edit any critical information in the database)
- > Perform a test procedure to check any connected luminaire
- > Set alarms, create tickets and assign them to maintenance operators
- > Control and adjust your luminaires in real time

Schröder EXEDRA LightSync: continuous adjustment of lighting levels to actual conditions

Schröder EXEDRA LightSync is an innovative service offered by the Schröder EXEDRA platform. It uses real-time data to continuously adjust the lighting level of a group of luminaires based on local traffic and weather conditions. With Schröder EXEDRA LightSync, cities can achieve the perfect balance between the safety and well-being of citizens, convenience and the sustainable use of outdoor lighting infrastructure.

Schröder EXEDRA LightSync uses georeferencing to collect environmental data and analyses factors such as traffic and weather via the Schröder EXEDRA platform. This information is used to calculate the appropriate lighting level and control commands are sent to all the luminaires in the group. The system retrieves updated data up to every 15 minutes, ensuring a rapid response to changes in the environment. If data is unavailable, the lighting level reverts to the pre-defined control program until data becomes available.

**Skip the hardware
Stop worrying about events
Forget calendars
Just sync!**

> Optimised energy savings

Schröder EXEDRA LightSync helps street lighting operators achieve a better balance between reducing light levels to save energy and ensuring the safety and well-being of road users.

> Enhanced convenience

The appropriate dimming profile and calendar are set once, as the service automatically adapts to surrounding events. This eliminates the need for managing multiple calendars for different situations.

> Integration with third-party platforms

The service leverages traffic and weather data from third-party platforms, eliminating the need for additional specific sensors in remote locations.

> Lower dimming levels

With the ability to automatically restore high lighting levels when the density of users increases, Schröder EXEDRA LightSync enables cities to operate at lower dimming levels than traditional profiles/calendars allow.

Pulls information from available data sources or types

Computes the adequate lighting level

Adapts the lighting accordingly

Collect, monitor, generate insights, process and adapt

OWLET IV: the state-of-the-art wireless controllers designed for EXEDRA

OWLET IV luminaire controllers operate Schröder's luminaires and luminaires from third parties. They offer easy installation and have fast plug-and-play commissioning. OWLET IV controllers use both cellular and mesh radio networks, **optimising geographical coverage**

and redundancy for continuous operation. DATALIFTs use mesh network to aggregate information from a cluster of MESHNODEs, and forward this on to the IoT platform using cellular connectivity. Among other features, OWLET IV controllers use advanced

cybersecurity mechanisms to protect the deployment in the city and provide accurate power outage information to the city's streetlight managers. OWLET IV controllers are managed with EXEDRA, Schröder's advanced smart lighting management platform.

FEATURES

- > **Hybrid architecture: local mesh (MESHNODEs and DATALIFTs) and cellular communication (DATALIFTs)**
- > **Gateway-less hybrid network architecture using WI-SUN mesh network & cellular connectivity**
- > **Built-in GPS and built-in photocell to control each luminaire based on local ambient light level**
- > **Embedded self-test capability to check installation**
- > **Offers responsive light-on-demand use cases triggered by local sensors**
- > **Over-the-Air (OTA) firmware update**
- > **End-to-end encrypted communication**

KEY ADVANTAGES

- > Auto-commissioning: easy installation and plug-and-play
- > Auto-geolocation: GPS-location detection and time synchronisation
- > Real time dynamic lighting: mesh technology to broadcast sensor triggering event locally within a cluster of luminaire controllers
- > Last gasp messaging: power outage detection allowing a last message when power cuts off
- > Asset management: asset data import
- > Tunable white: ability to control luminaires with variable colour temperature

Future-proofing the investment

Schröder EXEDRA unifies the lighting network thanks to its ability to control nodes plugged into Zhaga/NEMA sockets and luminaires from multiple manufacturers. With an API, EXEDRA can interact with third-party asset management systems to merge the whole scheme into a unique, modern, insightful and user-friendly platform.

Backing the city branding

Schröder EXEDRA not only provides real-time monitoring of connected urban assets such as luminaires, litter bins or public WiFi. Thanks to its automation centre, you can define conditional rules, set up alarms and automate ticketing to optimise on-site maintenance operations. All IoT devices using the same open standards for data and communication can seamlessly integrate into the platform. And, of course, in these iconic places, lighting can be adapted according to specific schedules to support special events.

Maximising both savings and safety

Schröder EXEDRA enables the creation of lighting scenarios including the most efficient dimming profiles and light-on-demand features based on sensor detection. The selection of sensor(s) to which the luminaires react and the associated configuration parameters (i.e. trigger activation delay, hold time) are easily assigned to luminaire controllers. The detection events generate useful data for decision-making regarding future investments and priorities.

Protecting wildlife

Schröder EXEDRA provides a flexible control solution that enables the creation of various clusters of luminaires programmed with specific scenarios for dimming and colour temperature changes. On installation, the system imports all information related to the luminaire configurations chosen after a careful lighting study. This asset inventory feature enables the implementation of solutions optimised from a design and control point of view.

It's time to
SHUFFLE
your world!

SMART & CONNECTED

SHUFFLE

Decluttering
cities on their
journey to
becoming smart

The SHUFFLE smart column is a connected, modular approach to city hardware. With plug-and-play rotatable modules that contain pre-certified hardware, it can be configured to suit your specific needs.

Redesign. Reorganise. Improve. Combine. Do these all at once with SHUFFLE, an integrated concept with unlimited opportunities to **bring the experience to a new level** in cities and venues. Information, identity, safety, communication, entertainment, mobility and much more. All your various features can be gathered elegantly into **one integrated platform**. Not set in stone, but with versatility and ready for future evolutions. You can create your personalised SHUFFLE by associating **up to 5 modules per column**, or pick one of our preconfigured variants.

KEY ADVANTAGES

- › Seamless integration of urban hardware in a refined column
- › Personalised combinations: up to 5 modules per column
- › Preconfigured versions: Campus, SOS, Security, Light and Mobility
- › Total versatility with 360° rotatable modules
- › Patented system for easy installation
- › Upgradable: modules can be added or replaced after installation
- › Fully connected platform

Leading with **non-stop innovation**

SHUFFLE was launched in 2015, and many enthusiastic customers who set out to shed extra light on their vibrant urban living spaces have installed it. And they went **beyond simple outdoor lighting**. They took the opportunity offered by this platform to bring new services into their environments, such as WiFi, surveillance cameras, loudspeakers, emergency buttons and EV chargers. Just a year after its launch, SHUFFLE was awarded '**Product of the Year 2016**' by the Highway Electrical Association (HEA) in the UK. A little while later, in 2017, SHUFFLE received the '**Smart City Award**' in London for its technology with great potential for smart cities. In 2020, Schröder made SHUFFLE independent from physical wiring for lightning-speed connectivity, creating the first wireless smart column. This spirit of constant innovation combined with exquisite design, attention to detail and a deep understanding of customer needs has positioned SHUFFLE as a benchmark in the market. Since their launch, SHUFFLE columns have delighted cities and private companies in **more than 35 countries** worldwide.

SHUFFLE SOS

THE CITIZENS' GUARDIAN ANGEL

SHUFFLE SOS offers the perfect solution for helping people and emergency services in critical situations. With one simple push of a button, citizens can quickly get in touch with the emergency services if they witness an incident or are the victim of an accident.

Using a voice-over IP intercom, people can explain the problem and **receive proper assistance**. The embedded cameras enable call centres to take the right actions thanks to a real-time video feed. The strobe light and horn, which can be triggered remotely, make sure that the emergency signal is seen and heard by bystanders in the area. They also **guide the emergency crew** to the exact location of the incident.

With SHUFFLE SOS, people never feel alone in a city. They receive the support they expect in the shortest possible time. Emergency services are able to react accordingly and cover a larger area, optimising their resources.

SHUFFLE CAMPUS

CREATING PLACES PEOPLE LOVE TO BE IN

SHUFFLE Campus is the right tool for ambitious companies, institutions, public services and cities wanting to offer a high-quality experience to their workers, customers, residents, citizens or visitors.

It is designed to provide multiple services, aesthetically and efficiently, to **business facilities, condominiums, academic, medical or sport complexes, parks, shopping malls or transport infrastructures** such as airports and train or bus stations. SHUFFLE Campus creates **safe, pleasant places, connecting people** to the internet, informing and entertaining them, while keeping an elegant and discreet presence that blends into any environment.

SHUFFLE Campus is **a great asset for placemaking** as it strengthens the connection between people and the urban environment with a minimal footprint.

SHUFFLE SECURITY

BUILDING CONFIDENCE IN OUTDOOR AREAS

Feeling secure is a basic human right. Your residents and visitors want to feel safe at all times. SHUFFLE Security delivers a strategic breakthrough to address this challenge with advanced lighting and security features.

It is designed to **create safe and pleasant outdoor areas:** tourist sites, parks and squares, outdoor spaces around public and private buildings (embassies, ministry buildings, banks, hospitals, schools, etc.), metro, bus or train stations, car parks and sports or leisure venues. SHUFFLE Security provides a monitoring system that enables bidirectional communication: from authorities to citizens or security companies to people in the environment, and vice versa, from end users to public/property managers.

SHUFFLE Security improves confidence in using outdoor environments. It encourages people to socialise, to contribute to the local economy and to develop a true sense of community.

SHUFFLE MOBILITY

MOVING TOWARDS NET ZERO

SHUFFLE Mobility is designed to charge electric vehicles and protect them from vandals. It can be installed in streets where it is difficult to establish infrastructure for electric vehicle charging.

SHUFFLE Mobility not only provides a charging solution for electric vehicles, it ensures **an outstanding experience for EV drivers** by helping them to find vacant chargers, by ensuring a high level of security for them and their car and by offering the best lighting solution at night.

SHUFFLE LIGHT

FOR ENDLESS CHALLENGES

SHUFFLE Light is designed to meet the various lighting needs of an area with elegance and high energy efficiency. Its aesthetic design integrates various lighting modules (360°, spot and light ring) with smart control features for dimming and light-on-demand scenarios.

The SHUFFLE Light smart column can be installed in any location where its versatility, connectivity and simplicity create additional value beyond basic lighting.

Designed to light roads, streets, squares and other places where creating a pleasant atmosphere is a key element, SHUFFLE Light benefits from **a wide range of photometries** and provides aesthetic consistency for various urban environments. It offers the perfect tool for placemaking as it frees up space that can then be used to enhance the urban experience and promote people's health, happiness and well-being.

Professional and secure wireless network

- Available in a 360° lighting module or in a dedicated module
- Multiple concurrent users per access point
- Stable connections at higher data rates
- Divisible bandwidth: e.g. to assign a dedicated part to city operators and a restricted bandwidth for the general public
- Unmatched scalability, cloud or locally managed

4G/5G **Providing 4G/5G capacity and coverage**

- High-speed mobile connection
- Blends into the urban environment
- Easy site acquisition for mobile operators
- Range of up to 100m
- Upgradable antenna can be added later, when additional capacity is needed
- The operator installs and owns the telecom equipment
- Easy access for maintenance
- Waterproof IP material
- Upgradable base module can be equipped for 5G networks

WIRELESS BACKHAUL

Base Unit
(SH18WB2-JN)

Terminal Unit
(SH18WB2-JM)

Wireless fibre communication network for smart city applications

- Wireless extended fibre connections to and from a pole
- The speed of fibre (up to 2.3Gbps), the flexibility of wireless
- Easy street level deployment
- Reliable, virtually interference-free operation
- Connect up to 8 SHUFFLEs from one Base Unit
- 400m auto-aligned range
- AES encryption
- Integrated managed PoE switch
- Operates in 60GHz V band

1 Building to SHUFFLE (star mode)

The Base Unit is mounted outdoors, on the side of a building or on a rooftop. It connects to 8 SHUFFLEs (Terminal Units) installed within a range of 400 metres max.

2 SHUFFLE to SHUFFLEs (star mode)

The Base Unit is integrated into a SHUFFLE. This connects to 8 SHUFFLEs (Terminal Units) installed within a range of 400 metres max.

3 Building to SHUFFLE (linear mode)

The Base Unit is mounted outdoors, on the side of a building or on a rooftop. It connects to one SHUFFLE (Base and Terminal Units) that itself connects to another SHUFFLE having the same hardware (BU+TU) and so on, in a daisy chain layout. The spacing between two SHUFFLEs can be up to 400 metres (max).

4 SHUFFLE to SHUFFLEs (linear mode)

The Base Unit is integrated into a SHUFFLE. It connects to one SHUFFLE (Base and Terminal Units) that itself connects to another SHUFFLE having the same hardware (BU+TU) and so on, in a daisy chain layout. The spacing between two SHUFFLEs can be up to 400 metres (max).

SPEAKER

Professional sound system for public service announcements, warnings and music

- Frequency range: 90 - 19,000Hz
- Full range speaker with dual cone
- Perfect sound - up to 25W power output
- Weatherproof / adapted to indoor and outdoor applications
- Digitally connected network speaker

CCTV - 360° 

QuadView
(SHCQV)

**Integrated 360-degree video
CCTV solution**

- Offers a 360° field of view
- Contains 4 separate sensors with wide 113° horizontal field of view per sensor
- Vertical angle of view: 62°
- Streams videos from four sensor units simultaneously
- Supports 1920x1200/1080 (1080p) resolution with up to 50/60fps (50/60Hz)
- Supports Wide Dynamic Range (WDR) – Forensic Capture
- Ideal for very bright and/or dark areas
- Support for Zipstream technology lowers bandwidth and storage use
- Withstands dust, rain, snow, vibrations, shocks and impacts
- IP connectivity through standard Ethernet ports
- Power over Ethernet or 8–28V DC
- Features two SD card slots for optional local storage

Universal camera
bracket (SHCBR)

Integrated hanging bracket for PTZ cameras

- Compatible with most PTZ cameras on the market
- Excellent stability for minimal camera movement
- Concealed cable management

INTERCOM SOS

One-touch system to contact operators and/or to trigger panic response scenarios

- Vandal-resistant SIP and IP intercom
- Optional HD video at up to 30FPS (1440x1080px) and H.264 for integration with most video solutions
- Crystal clear audio
- Active background noise cancellation
- Automatic volume adjustment
- Stainless steel front plate with one button
- Can interact with SHUFFLE Strobe, light ring, horn and cameras

STROBE SOS

360° Lighting with strobe
(SH36L2-HL/SH36L2-HM)

Vital visual aid for emergencies

- Lumen package range: from 1,500 to 8,100lm
- Flashing blue strobe light
- Can be triggered remotely or locally via the intercom button

HORN

Horn (SH18S2-HN/SH18S2-HO)

Warning or alarm with a powerful electronic tone

- Warning or alert to the nearby population
- Supports voice-over IP
- Multi-tone up to 105dB
- Can be triggered remotely
- Can be integrated into a global warning system
- Can be linked to SHUFFLE Intercom

IZYLUM

Design: Indio da Costa

MAIN APPLICATIONS

A time-saving,
versatile, high-
performance
road and
urban solution

Based on Schröder's experience and proven track record with road and urban LED lighting, the IZYLUM luminaire benefits from numerous innovations.

IZYLUM provides the best experience for all stakeholders in public lighting: cities looking for a fast return on investment with an environmentally friendly, easy-to-operate lighting solution, contractors wanting to save time and avoid mistakes during installation, and citizens requiring safe and comfortable environments.

This connected-ready range of luminaires not only offers a realistic platform for smart cities; its compact, lightweight, optimised design minimises the carbon footprint at every stage of the product lifecycle.

IZYLUM stands out as the best in class for a circular economy.

IZYLUM	1	2	3	4	5
Recommended installation height	4 to 15m+ / 13' to 49'+				
Typical luminaire output flux (range)	600 to 8,700lm	1,900 to 15,000lm	2,600 to 23,900lm	4,600 to 32,800lm	4,500 to 40,000lm
Power consumption	7.2W to 65W	18.6W to 109W	20W to 162W	41W to 218W	41W to 280W
Colour temperature	Warm white (722, 727, 730 and 830), neutral white (740) or cool white (757)				
Nominal voltage	120-277V / 220-240V / 347-480V 50-60Hz				
Surge protection	6 / 8 / 10kV				

KEY ADVANTAGES

- > Maximised savings in energy and maintenance costs
- > New generation of LensoFlex[®]4 and MidFlex[™]2 photometric engines offering high-efficiency lighting, comfort and safety
- > 5 sizes to provide the most accurate solutions for numerous road and urban applications
- > Tool-free access with a clear, perceptible click upon closing
- > On-site adjustment from post-top to side-entry without disconnecting the luminaire from the pole thanks to IzyFix
- > Wide range of operating temperatures
- > Zhaga-D4i certified
- > Connected-ready

BRACKETS

With KEMA brackets, the IZYLUM luminaire creates aesthetical combinations suited to numerous applications.

DESIGN HIGHLIGHTS

IZYLUM integrates two new, highly efficient photometrical platforms: LensoFlex®4 and MidFlex™2.

The IzyFix universal fixation system for switching from a post-top to a side-entry position facilitates ordering and installing luminaires.

The luminaire can be opened without any tools thanks to two stainless steel spring clamps.

IZYLUM is connected-ready and can operate with various sensors and control systems.

AMPERA

MAIN APPLICATIONS

High-
performance
LED lighting
solution
with fast
return on
investment

Creating an efficient, economical and sustainable LED lighting solution was the driving force behind the development of AMPERA.

AMPERA is a road luminaire highlighting high performance, technical innovation, and simplicity. This innovative luminaire thus provides powerful lighting, fast and simple installation, easy lighting network management, as well as the fastest return on investment.

Available with various lumen packages - and numerous lighting distributions - AMPERA can meet all your road and urban lighting needs.

				
	AMPERA	EVO 1	EVO 3	MAXI
Recommended installation height		4m to 15m 13' to 49'		
Typical luminaire output flux (range)		600 to 14,300lm	2,600 to 23,200lm	5,900 to 41,200lm
Power consumption		7.8W to 110W	25.9W to 167W	81W to 310W
Colour temperature		Warm white (722, 727, 730 and 830), neutral white (740), cool white (757)		
Nominal voltage		220-240V / 50-60Hz		
Surge protection		10kV		
      				

KEY ADVANTAGES

- > Cost-effective, efficient lighting solution for a fast return on investment
- > On-site adjustment from post-top to side-entry without disconnecting the luminaire from the pole thanks to IzyFix
- > Tool free access: easy and safe maintenance
- > Connected-ready for your future smart city requirements
- > Compatible with the Schröder EXEDRA control platform
- > Zhaga-D4i certified
- > Adjustable inclination on site

BRACKETS

With DIO brackets, the AMPERA luminaires create aesthetical combinations suited to numerous applications.

DESIGN HIGHLIGHTS

Tool-free opening, and a mounting with two separate parts for easy installation.

The IzyFix universal fixation system, for switching from a post-top to a side-entry position, facilitates luminaire ordering and installation.

Connected-ready for your future smart city projects.

Designed for a circular economy with easy replacement of internal components.

TECEO

Design: Michel Tortel

MAIN APPLICATIONS

Lighting in
an efficient
and
sustainable
manner

TECEO is a market benchmark recognised by independent bodies.

This successful luminaire has enabled thousands of towns and cities to improve lighting levels, generate energy savings and reduce their ecological footprint.

Thanks to its broad range of lumen packages, its impressive scope of light distributions and its various control options, TECEO provides the ideal solution for lighting numerous environments; from bike paths, squares and car parks, to residential streets.

Designed for versatile mounting with the same universal piece allowing both side-entry and post-top fixation on a spigot, TECEO is easy to combine with standard poles, refined brackets or wall brackets.

TECEO (GEN2)	S	1	2
Recommended installation height	4 to 12m / 13' to 39'		
Typical luminaire output flux (range)	600 to 9,8000lm	1,300 to 19,100lm	3,200 to 38,200lm
Power consumption	7W to 77W	13W to 152W	30W to 280W
Colour temperature	Warm white (722, 727, 730 and 830) or neutral white (740), cool white (757)		
Nominal voltage	120-277V / 220-240V / 347-480V 50-60Hz		
Surge protection	6 / 10 / 20kV		

KEY ADVANTAGES

- > 3 sizes for flexibility
- > Maximised savings in energy and maintenance costs
- > LensoFlex® technology offering high performance photometry, comfort and safety
- > Dark sky compliant: ULOR = 0%, no up-light
- > Universal fixation adapted for side-entry and post-top mounting
- > Zhaga-D4i certified
- > Connected-ready
- > Solar-powered variants

BRACKETS

With ELAYA brackets, the TECEO luminaire creates aesthetical combinations suited to numerous applications.

DESIGN HIGHLIGHTS

The top opening provides access to the gear compartment for cabling and maintenance.

TECEO is available with both NEMA or Zhaga sockets, and complies with the ZD4i standard

The TECEO range offers universal fixations for spigots ranging from Ø32 to Ø76mm.

The inclination angle can be adjusted on site for both post-top (0 to +15°) and side-entry (0 to -15°) configurations.

AXIA 2

MAIN APPLICATIONS

The most comprehensive & economical LED lighting solution

AXIA 2 provides the most comprehensive and best value LED solution for lighting any road, street or pedestrian area.

It offers all the advantages of LED lighting, without the high cost associated with LEDs.

With its photometric engine providing light distributions adapted to various applications, AXIA 2 is one of the highest performing luminaires available on the market to offer a fast return on investment.

Building on the strengths of the ground breaking AXIA, this second-generation luminaire is designed to be the ultimate multi-purpose fixture, providing a cost-effective solution for those looking to reduce their energy costs.

AXIA 2	2.1	2.2
Recommended installation height	5 to 10m / 16' to 33'	
Typical luminaire output flux (range)	200 to 9,100lm	3,800 to 20,000lm
Power consumption	5W to 68W	29.4W to 148W
Colour temperature	Warm white (727, 730 and 830) or neutral white (740)	
Nominal voltage	220-240V / 50-60hz	
Surge protection	10kV	

KEY ADVANTAGES

- > Cost-effective and efficient lighting solution for a fast return on investment
- > Photometric engine with light distributions adapted to various applications
- > ThermiX® for long lasting performance
- > Universal fixation adapted for side-entry and post-top mounting
- > Adjustable inclination in steps of 2.5°
- > Zhaga-D4i certified
- > Connected-ready

DIMENSIONS | MOUNTING

BRACKETS

With ANDO brackets, the AXIA 2 luminaire creates aesthetical combinations suited to numerous applications.

DESIGN HIGHLIGHTS

Universal fixation for side-entry or post-top mounting with adjustable inclination in increments of 2.5°.

Easy access to the electrical compartment for maintenance.

ProFlex™ photometric engine for precise light distributions with the highest efficiency.

Cooling fins for optimised thermal management and long-lasting performance.

AXIA 3

MAIN APPLICATIONS

Engineered
for
performance,
designed for
the customer
experience

With customer feedback playing a critical part in our innovative design process, we developed AXIA 3.

More than a luminaire, it is a platform delivering sustainability, cost-effectiveness and customer experience while supporting smart city frameworks.

Based on experience from the hundreds of thousands AXIA luminaires installed worldwide, this third generation luminaire pushes the boundaries with photometric innovation, ease and speed of installation and FutureProof connectivity.

Available in three sizes, AXIA 3 enables towns and cities to maximise efficiency when lighting numerous environments, from bike paths, squares and car parks to residential streets, carriageways, urban roads and large boulevards.

This lightweight, compact luminaire combines quality of light with a minimal carbon footprint. It stands out with its easy installation and carefree maintenance, reducing operating costs.

AXIA 3	3.1	3.2	3.3
Recommended installation height	4 to 12m / 13' to 39'		
Typical luminaire output flux (range)	600 to 6,100lm	2,000 to 11,300lm	4,000 to 23,600lm
Power consumption	8.4W to 44W	15.3W to 78W	28.6W to 170W
Colour temperature	Warm white (727 and 730) or neutral white 740		
Nominal voltage	220-240V / 50-60hz		
Surge protection	10kV		

KEY ADVANTAGES

- > Maximised savings in energy and maintenance costs
- > ProFlex™ photometric engines offering high efficiency lighting, comfort and safety
- > 3 sizes to provide the most accurate solutions for numerous road and urban applications
- > Easy installation: pre-cabled and equipped with a universal fixation part adapted for side-entry and post-top mounting
- > Adjustable inclination for optimised photometry and uniformity
- > Zhaga-D4i certified
- > Connected-ready

DESIGN HIGHLIGHTS

The ProFlex™ photometric engine provides the highest efficiency.

The AXIA 3 range has a universal fixation part for spigots ranging from Ø32 to Ø76mm.

The inclination is adjustable on site for optimised photometry and further energy savings.

AXIA 3 is connected-ready and can operate with various sensors and control systems.

AXIA 3 EVO

MAIN APPLICATIONS

URBAN & RESIDENTIAL STREETS

BIKE & PEDESTRIAN PATHS

SQUARES & PEDESTRIAN AREAS

RAILWAY STATIONS & METROS

CAR PARKS

Innovative,
lightweight
lighting
solution
with excellent
performance

From proven experience with the renowned AXIA luminaires comes AXIA 3 EVO, completing the range with an innovative and lightweight urban luminaire dedicated to lighting residential areas.

The first of its kind, AXIA 3 EVO was developed on the basis of the specific needs of residential lighting spaces where well-being and security are crucial criteria.

Combining various technical innovations with a minimalistic design, AXIA 3 EVO offers an effective lighting solution to provide people with a pleasant and secure environment.

AXIA 3 EVO stands out by providing a compact luminaire fitted with advanced technologies, helping towns and cities generate significant energy savings and reduce their ecological footprint and operating costs.

AXIA 3 EVO

Recommended installation height	4 to 12m / 13' to 39'
Typical luminaire output flux (range)	600 to 6,600lm
Power consumption	6.6W to 52.5W

AVENTO

MAIN APPLICATIONS

The budget-friendly, high-efficiency solution

Compact yet powerful, light yet robust, affordable yet highly efficient, AVENTO provides the fastest return on investment for road and area lighting.

AVENTO offers a superior lumen/watt ratio to deliver a high-performance, energy-efficient lighting solution at an affordable price for various landscapes including pedestrian areas, streets, roads, car parks and motorways.

AVENTO is available in four sizes to provide a consistent solution in terms of the right lumen package and light distribution for a broad range of environments. It ensures that the lighting meets the actual needs of the place to be lit.

AVENTO is the ideal tool for shortening the payback time of an LED lighting installation and providing the best return on investment.

AVENTO	S	1	2	3
Recommended installation height	4 to 45m / 13' to 148'			
Typical luminaire output flux (range)	2,400 to 9,700lm	3,000 to 24,300lm	6,100 to 36,100lm	21,800 to 67,200lm
Power consumption	18.2W to 74W	25W to 172W	48W to 258W	218W to 490W
Colour temperature	Warm white (730 and 830) or neutral white (740)			
Nominal voltage	120-277V / 220-240V / 347-480V 50-60Hz			
Surge protection	6 / 8 / 10 / 20kV			

KEY ADVANTAGES

- > Cost-effective and efficient lighting solution
- > Superior efficiency
- > Accelerated return on investment
- > 4 sizes for flexibility and consistency when lighting P1 to P6 and M1 to M6 applications in accordance with CIE 115
- > Easy and fast installation
- > Wide temperature operating range
- > Dark sky compliant: ULOR = 0%, no up-light
- > Connected-ready

BRACKETS

With DIO brackets, the AVENTO luminaire creates aesthetical combinations suited to numerous applications.

DESIGN HIGHLIGHTS

AVENTO provides tool-free access to the gear compartment.

To ensure optimal thermal management in hot conditions, AVENTO incorporates large cooling fins.

AVENTO includes a universal $\varnothing 42-60\text{mm}$ fixation part for side entry-mounting.

AVENTO can be delivered with a shorting cap to add IoT features at any time in the future.

ROAD

VOLTANA

MAIN APPLICATIONS

The ultimate,
cost-effective,
efficient
family of
luminaires
that pays for
itself

VOLTANA delivers sustainable solutions that dramatically reduce energy consumption and improve lighting levels with the lowest investment.

The VOLTANA family is available with multiple lumen packages thanks to the various sizes, driving currents and numerous light distributions - from very narrow to extra wide - to light any rural and urban landscape. This luminaire is designed for side-entry and post-top mounting and can be adapted on site thanks to an incorporated inclination system to optimise the photometry.

VOLTANA can be managed by several control systems. It can operate in a closed independent network with sensors or in a global network in a city through wireless communication.

VOLTANA	EVO 1	1	2	3	4
Recommended installation height	4 to 12m / 13' to 39'				
Typical luminaire output flux (range)	500 to 7,800lm	900 to 4,200lm	2,000 to 7,000lm	3,100 to 10,300lm	4,100 to 13,500lm

FLEXIA

Design: iDl Design

MAIN APPLICATIONS

The ultimate platform for your unique urban lighting solution

Various designs, many configurations, one single DNA. FLEXIA is the ultimate platform for creating your unique urban lighting solution.

Focus on creating a unique ambiance for people living in and visiting your spaces instead of dealing with non-stop constraints.

With fewer technical limitations, more design consistency and the guarantee of the latest innovations, FLEXIA offers a versatile technological platform with refined aesthetics.

The FLEXIA range incorporates a refined design and state-of-the-art LED technology to provide an energy-efficient lighting solution that enhances city streets while preventing light pollution.

The FLEXIA range delivers high-quality lighting with design consistency and lowers the carbon footprint of towns and cities - creating a safe and attractive environment.

FLEXIA	FG	BRASO	TOP	DP	POEME	QUERCUS
Recommended installation height	4 to 12m 13' to 39'	4 to 5m 11' to 16'	4 to 5m 11' to 16'	4 to 10m 13' to 33'	4 to 10m 13' to 33'	4 to 12m 13' to 39'

DESIGN HIGHLIGHTS

FLEXIA Top offers a slip-over mounting on Ø60 or Ø76mm spigots. It is also available for suspended variants.

FLEXIA FG Midi is designed for side-entry mounting with the versatile SOFIA bracket, enabling numerous configurations.

FLEXIA includes instant electrical disconnection on opening and a completely tool-free removable LED engine.

To remain as open and interoperable as possible, all FLEXIA variants are available with both NEMA or Zhaga sockets and comply with the Zhaga-D4i standard.

Whether you go for a classical refined shape or an organic design, the FLEXIA suspended variants blend perfectly into your landscapes to create a unique ambiance.

Built with recyclable materials and with an architecture designed for easy service and refurbishment, FLEXIA is a role model for a circular economy.

FLEXIA

DIMENSIONS

Jewel in the crown

Lighting can sometimes be seen as a commodity and luminaires considered as basic urban amenities. But it is not an unavoidable law of nature: not all luminaires have to look the same.

FLEXIA brings a new dynamic and breaks the rules. With its built-in custom capabilities, FLEXIA offers opportunities to reinforce the identity of an environment. It can either blend into a landscape by matching a transport company's branding, embodying a community identity, advocating local craftsmanship, ancestral know-how and industrial successes or be a privileged devotee of local heroes by wearing a sports team's colours. With FLEXIA Signature, there are no limits to the imagination.

PIANO

Design: Michel Tortel

MAIN APPLICATIONS

The ideal instrument for urban environments

Designed by Michel Tortel to enhance urban environments both by day and by night, the PIANO range has a refined design and a high-quality finish.

This luminaire complements any landscape where aesthetics and performance are important. Taking advantage of state-of-the-art LED technology and control solutions, PIANO provides the right light, anywhere, anytime in the urban environment. This range includes 2 different sizes as well as side-entry and post-top fixation so that streets, passages and large pavements can be lit using the same luminaire design.

This winning combination of performance, design and flexibility makes it perfect for lighting streets, pedestrian areas, parks and bike paths. The PIANO range offers towns and cities the ideal tool to improve lighting levels, generate energy savings and reduce their ecological footprint.

PIANO	Mini	Midi
Recommended installation height	4 to 12m / 13' to 39'	
Typical luminaire output flux (range)	1,800 to 7,500lm	3,500 to 16,900lm
Power consumption	18.4W to 53W	34.7W to 117W
Colour temperature	Warm white (727, 730 and 830) or neutral white (740)	
Nominal voltage	220-240V / 120-277V / 347-480V 50-60Hz	
Surge protection	4 / 10 / 20kV	

KEY ADVANTAGES

- > Range of luminaires for various urban applications
- > LensoFlex®2: high-performance photometry
- > FutureProof: smart upgradability

Efficiency
and style
throughout
the city

The YOA range offers a complete solution for lighting urban spaces with the same efficiency and the same astonishing elegance throughout the city.

From large avenues to narrow streets and squares, the various configurations (side-entry, post-top and catenary solutions) provide aesthetic ensembles to create a distinctive identity for the city landscape.

The YOA luminaire is equipped with the LensoFlex® photometric engine, which offers high-performance photometry optimised for each specific application with minimum energy consumption.

		
YOA	Midi	Maxi
Recommended installation height	4 to 15m / 13' to 49'	
Typical luminaire output flux (range)	500 to 15,300lm	3,300 to 25,300lm
Power consumption	8.7W to 116W	38W to 167W
Colour temperature	Warm white (727, 730, 822 and 830), or neutral white (740)	
Nominal voltage	120-277V / 220-240V / 347V 50-60Hz	
Surge protection	10kV	

KEY ADVANTAGES

- > Maximised savings on energy and maintenance costs
- > LensoFlex®2 offering high performance photometry, comfort and safety
- > High-end aesthetic finish
- > Flexible number of LED modules and photometry
- > ThermiX® for long lasting performance
- > Connected-ready

YOA Midi is also available with a catenary mounting.

DECORATIVE

BRACKETS

With TRESSA brackets, the YOA luminaire creates aesthetical combinations suitable for numerous applications.

DESIGN HIGHLIGHTS

YOA offers numerous mounting options: post-top, side-entry and catenary.

YOA is available with TRESSA, LUCEA and LYRE brackets.

YOA offers a high-quality finish.

YOA can be fitted with a Back Light Control system to prevent intrusive light.

CITEA NG2

MAIN APPLICATIONS

The iconic urban lighting luminaire gets a makeover

The CITEA NG2 luminaires are keeping their renowned pure urban design and getting a complete technical makeover to integrate the latest photometric and connectivity technology.

CITEA NG2 is equipped with innovative photometric engines, specifically developed to provide high visual performance while considerably reducing energy consumption. CITEA NG2 is also a connected-ready lighting solution, available with various connectivity options to bring urban lighting into the smart technology era and ease lighting management.

Following their predecessors' philosophy, the CITEA NG2 luminaires are designed to efficiently light various spaces where the safety and well-being of those using the environment are essential.

CITEA NG	Mini	Midi
Recommended installation height	4m to 12m 13' to 39'	
Typical luminaire output flux (range)	900 to 21,200lm	900 to 21,100lm
Power consumption	10.5W to 173W	10.5W to 148W
Colour temperature	Warm white (722, 727, 730 and 830), or neutral white (740)	
Nominal voltage	120-277V / 220-240V / 347V 50-60Hz	
Surge protection	10 / 20kV	

KEY ADVANTAGES

- > Timeless and elegant design for rural and urban environments
- > Two sizes available: Mini and Midi
- > Protector in extra-clear tempered glass for high performance
- > Wide range of mounting options and brackets
- > Low energy consumption
- > FutureProof: photometric engine and electronic assembly are easy to replace on site
- > Connected-ready for your future smart city requirements
- > Zhaga-D4i certified
- > Solar-powered variants

DIMENSIONS | MOUNTING

CITEA NG	Mini	Midi
A	500mm 19.7"	595mm 23.4"
B	160mm 6.3"	185mm 7.3"
KG	12kg 26.4lbs	15kg 33lbs

The CITEA NG range is available with numerous options for post-top, side-entry, catenary, wall or suspended mounting. Please consult us for more information.

BRACKETS

With FLO brackets, the CITEA NG luminaire creates aesthetical combinations suitable for numerous applications.

DESIGN HIGHLIGHTS

CITEA NG2 is equipped with the latest photometric engines to provide the best performance.

CITEA NG2 benefits from a large range of mounting options and brackets.

The CITEA NG2 door can be fully removed to easily integrate any future technologies.

CITEA NG2 is a connected-ready luminaire integrating the latest connectivity options.

YMERA

Design: AF Lighting

MAIN APPLICATIONS

Aesthetic
appeal,
comfort and
efficiency

The YMERA luminaire features a refined design and state-of-the-art LED technology, providing an energy-efficient lighting solution that enhances city streets.

Suited to roads, public squares and other urban outdoor areas, YMERA enables high-quality lighting and a lower carbon footprint for towns and cities - creating a safe and attractive environment.

Scandinavian inspired, YMERA brings elegance to cities through four distinctive versions including an illuminated dome and a decorative skirt.

YMERA benefits from highly efficient light distributions that are compliant with stringent standards for glare control. This refined luminaire has been specifically developed to reduce disability glare and improve the quality of light.

YMERA

Recommended installation height	4 to 12m / 13' to 40'
Typical luminaire output flux (range)	1,300 to 14,400lm
Power consumption	18.1W to 105W
Colour temperature	Warm white (727, 730, 822 and 830) or neutral white (740)
Nominal voltage	220-240V – 50-60Hz
Surge protection	4 / 10kV

KEY ADVANTAGES

- > Elegant and robust design with four aesthetic versions
- > State-of-the-art LED technology for low energy consumption
- > Broad range of lighting distributions
- > High visual comfort: glare up to G*4 class, TI <6%
- > Designed for side-entry and post-top mounting (depending on accessory)
- > Supplied pre-wired to facilitate installation (optional quick-on connectors)
- > Connected-ready

DIMENSIONS | MOUNTING

KG	8kg 17.6lbs	9kg 19.8lbs

Ø76mm

Ø42mm
Ø60mm

YMER A is available with numerous options for post-top, side-entry or suspended mounting. Please consult us for more information.

BRACKETS

With MILLA brackets, the YMERA luminaire creates aesthetical combinations suitable for numerous applications.

DESIGN HIGHLIGHTS

YMERA includes a universal Ø60mm slip-over fixation piece.

A penetrating fixation piece for a Ø60mm tube is available as an option for flush mounting.

YMERA is available with an illuminated dome (high-power LED) and a decorative skirt.

As an option to increase the lumen output, a flux enhancer can be placed around the LEDs.

HESTIA GEN2

Design: Elizabeth de
Portzamparc

MAIN APPLICATIONS

Elegant
solution with
cutting-edge
LED
technology

HESTIA GEN2 is a fluid, light and elegant LED luminaire designed to bring a touch of refinement to your urban spaces while helping you benefit from the advantages of the latest lighting innovations.

HESTIA GEN2 offers an economical lighting solution based on state-of-the-art photometric technologies. This luminaire is available with different lumen packages, all characterised by low energy consumption for high-quality photometric performance.

Available in 2 sizes (Mini and Midi), this outdoor LED lighting adapts to any kind of urban space. HESTIA GEN2 is a connected-ready luminaire that can be fitted with various remote control technologies to enable perfectly optimised urban lighting management.

HESTIA LED	MINI	MIDI
Recommended installation height	4 to 12m / 13' to 39'	
Typical luminaire output flux (range)	900 to 8,800lm	2,600 to 14,200lm
Power consumption	10W to 62W	25W to 102W
Colour temperature	Warm white (722, 727, 730 and 830) or neutral white (740)	
Nominal voltage	120-277V / 220-240V / 347V / 50-60Hz	
Surge protection	10kV	

KEY ADVANTAGES

- > **Elegant design** incorporating the advantages of LED technology
- > **Low energy consumption**
- > **Range with two sizes and numerous lumen packages**
- > **Proven LensoFlex[®]4 photometrical engines**
- > **Connected-ready for your future smart city requirements**

ALBANY

MAIN APPLICATIONS

A versatile
best-seller
converted to
connected
LED
technology

A classic of the Victorian era, ALBANY is notable for its versatility.

Available in two sizes, with a range of LED photometric engines and a timeless design, it is suitable for large urban centres as well as villages or towns.

Adopted from Spain to China and from Brazil to Malaysia, the design of the ALBANY luminaires please at every latitude.

Now equipped with state-of-the-art LED technology, this classic luminaire is ready to improve the quality, comfort and safety of your lighting installation while offering significant energy savings and reduced CO₂ emissions.

		
	ALBANY LED	ALBANY LED Maxi
Recommended installation height	4 to 10m / 13' to 33'	
Typical luminaire output flux (range)	600 to 15,600lm	800 to 11,800lm
Power consumption	8W to 114W	11W to 101W
Colour temperature	Warm white (722, 727, 730, 822 and 830) or neutral white (740)	
Nominal voltage	220-240V / 50-60Hz	
Surge protection	10kV	

KEY ADVANTAGES

- > A classic shape with the advantages of LED technology
- > Low energy consumption
- > Photometric engines adapted to various applications
- > Two sizes for aesthetic coherence
- > Robust, recyclable materials
- > Numerous mounting options (various post-top or suspended)
- > Connected-ready (ALBANY GEN2 Midi only)
- > Zhaga-D41 certified (ALBANY GEN2 Midi only)

DIMENSIONS | MOUNTING

ALBANY	GEN2 Midi	LED Maxi
A	555mm 21.9"	700mm 27.6"

A modern
identity for
efficient
catenary
LED lighting

The DEXO luminaire uses state-of-the-art LED technology to provide cost-effective lighting for urban catenary applications.

The combination of a pure and elegant design with the high-performance LensoFlex® LED photometric engine increases safety and comfort while creating a distinctive identity in the city.

Made of robust, recyclable materials - die-cast aluminium and glass - DEXO offers efficient lighting with dramatic energy savings compared with luminaires equipped with traditional light sources.

The DEXO can be equipped with its suspension in transversal or axial orientation to suit most applications in urban lighting.

The flexible combinations of LED configurations, driving currents and dimming options make DEXO the perfect tool for improving safety and comfort while reducing the ecological footprint.

DEXO

Recommended installation height	4 to 10m / 13' to 33'
Typical luminaire output flux (range)	3,800 to 12,700lm
Power consumption	35W to 96W

Combining all lighting needs in a single column

The MODULLUM range offers a lighting system for the creativity of architects and city planners.

Reducing the quantity of poles and organising urban furniture in an optimal manner are key issues for preserving open spaces and making them as welcoming as possible.

The MODULLUM column provides a comprehensive solution for a variety of applications throughout the city.

Thanks to multiple lighting configurations, it can potentially meet every need in the urban space.

The versatility of MODULLUM, with its different modules as well as variable diameters and heights of up to 9.5 metres, guarantees a perfect match between the column and its architectural environment.

MODULLUM is available in four sizes and can be equipped with one to five modules which swivel around 360° so as to better fit the desired function: lighting roads and squares, illuminating façades or accentuating objects.

MODULLUM offers a broad palette of light distributions for each of its configurations.

Refined design and LED technology: the ideal combination for urban lighting

With its simple but very elegant linear design, RIVARA provides a complete range of luminaires to light diverse landscapes.

The RIVARA luminaire is available with a single or double bracket. A wall bracket is also available to maintain aesthetic consistency in areas where poles cannot be installed. A bollard of 1.25m complements the range and provides a solution for pathways and surrounding areas.

This winning combination of performance, design and flexibility enables the RIVARA range to light streets, residential areas, parks, bicycle and pedestrian paths with a better quality of light.

Furthermore, it generates energy savings and reduces the ecological footprint with perfect aesthetic integration into the environment.

RIVARA

Recommended installation height

4 to 6m / 13' to 20'

Typical luminaire output flux (range)

800 to 6,600lm

Ambiance
combined
with
energy
performance

Atmosphere, comfort and energy savings to ideally replace the opal sphere luminaire.

Lighting parks, squares and residential areas requires a specific approach that is very different from lighting roads.

The creation of ambiance plays a prominent role. However, this must not be done at the expense of efficiency.

The age of the opal sphere luminaire with high energy consumption and a source of light pollution is gone forever.

HAPILED, an economical, aesthetic, robust and efficient LED solution, is here to replace it.

HAPILED

Recommended installation height

3 to 5m / 10' to 16'

Typical luminaire output flux (range)

800 to 12,400lm

Power consumption

11.4W to 105W

Colour temperature

Warm white (727, 730, 827 and 830) or neutral white (740)

Nominal voltage

220-240V / 50-60Hz

Surge protection

10kV

IP 66

IK 10

KEY ADVANTAGES

- > Elegant and comfortable solution for creating a warm ambiance
- > Low energy consumption
- > Low light pollution (ULOR 3%)
- > Several light distributions
- > FutureProof: designed for on-site replacement of the LED photometric engine
- > Luminaire supplied pre-wired to facilitate installation
- > Connected-ready

solution with
cutting-edge
LED
technology

The PILZEO post-top luminaire transforms the classic 'mushroom' lantern into a contemporary design. Based on the proven LensoFlex® LED engine, PILZEO ensures photometric performance to provide safety and well-being in the public space.

The name PILZEO refers directly to the 'Pilzleuchte' - literally 'mushroom luminaire' - a very popular type of lantern in German-speaking countries.

This classical form has been refreshed to provide aesthetic continuity while generating massive energy savings.

The PILZEO luminaire is adapted to various urban landscapes such as residential areas, parks, squares, bicycle paths and historical urban centres.

PILZEO

Recommended installation height

3 to 5m / 10' to 16'

Typical luminaire output flux (range)

1100 to 7,800lm

Power consumption

10W to 64W

Colour temperature

Warm white (727, 730 and 830) or neutral white (740)

Nominal voltage

220-240V / 50-60Hz

Surge protection

10kV

KEY ADVANTAGES

- > Cost-effective lighting solution for the creation of ambiance
- > Elegant design for low height installation
- > Tool-free access for maintenance

and efficiency

While delivering a high degree of visual comfort, INOA LED enables significant energy savings compared to equivalent luminaires fitted with traditional light sources.

The INOA LED luminaire is available in a wide range of versions. The diffuser bowl can be equipped with an additional clear or striated protector. This second protector surrounds the luminaire with subtle charm. At night, the magic happens: when one approaches it, the drop of light in the protector seems to move under the play of the reflections.

These various configurations are combined with two sizes of top canopy: small or large.

The discreet elegance of the INOA LED luminaire makes it an ideal choice for enhancing any landscape. It offers several light distributions to meet the requirements for lighting parks and squares as well as urban and residential areas.

INOA LED

Recommended installation height

3.5 to 5m / 11' to 16'

Typical luminaire output flux (range)

700 to 9,900lm

The holistic lighting solution for living cities

Where there are people, there is light. But not all lighting solutions can create the desired atmosphere and contribute to the attractiveness of a place. With the right light, all urban spaces unleash their potential to connect people and create a sense of well-being and safety.

Every urban setting has a story to tell. With this belief in mind, we have created VALINTA. Designed both as a luminaire for urban lighting and a floodlight for architectural enhancement, VALINTA provides aesthetic and technical consistency for all types of application in the city, through various lumen packages, light distributions and LED types (white or RGBW).

This holistic approach to urban lighting enables city planners, lighting designers and architects to explore the power of VALINTA to beautify cities. From basic lighting to peak illumination, VALINTA is your ally in revealing and magnifying every detail of the city.

VALINTA	Micro ILLUM	Mini ILLUM	Midi ILLUM	Maxi ILLUM	Midi URBAN	Maxi URBAN
Recommended installation height	-	-	-	-	4 to 8m 13' to 26'	4 to 12m 13' to 39'

VALINTA CURVE

VALINTA GROOVE

VALINTA SCOPE

DESIGN HIGHLIGHTS

To provide efficient urban lighting solutions, VALINTA takes advantage of the latest generation of LensoFlex photometric engines.

The floodlight version of VALINTA relies on a unique LED PCBA layout, inspired by stained glass windows.

Unique mounting system: fix the base on a surface or a pole, insert the male part and lock it by rotating the luminaire. This two-step operation only requires one person.

The tiltable bracket offers a wide range of settings in both axes to direct light precisely where it is needed.

For maximum flexibility, the photometric engine can be orientated on site over a range of $\pm 90^\circ$.

VALINTA is designed both for surface and pole mounting.

DIMENSIONS | MOUNTING

SCULPDOT

A	160mm 6.3"
B	240mm 9.4"
C	199mm 7.8"
KG	7kg 15.4lbs

Mounting by means of a fork enables the inclination to be precisely adjusted on site.

DESIGN HIGHLIGHTS

SCULPDOT is available with monochromatic, RGBW and tunable white LEDs.

Thanks to an external refractor, the beam can be easily adapted on site.

For dynamic lighting scenarios, SCULPDOT can be controlled with DMX or DALI protocols.

SCULPDOT is supplied with an internal driver.

SCULPFLOOD

Design: Voxdata

MAIN APPLICATIONS

ACCENT & ARCHITECTURAL

BRIDGES

Versatile floodlights for large-scale accent and architectural lighting

The SCULPFLOOD LED floodlight range includes two power versions to provide the best solution for transforming medium and large architectural structures including skyscrapers, monuments, façades, roundabouts, bridges and stadiums into landmarks.

Compact and stylish, the SCULPFLOOD range offers refined floodlights with a high-quality build, feel and finish.

The two versions provide a high degree of flexibility with photometry adjustable on site and precise fine-tuning through brackets. These features help lighting designers deliver their desired result.

SCULPFLOOD is dedicated to creating striking lighting effects and enhance the value of architectural buildings at night. Using control systems, dynamic lighting scenarios can be achieved for a dramatic result.

		
SCULPFLOOD	60	150
Typical luminaire output flux (white LEDs)	1,900 to 5,700lm	6,000 to 18,100lm
Power consumption	41W to 70W	120W to 212W
Colour temperature	Warm white (830), neutral white (840), RGB CW, tunable white	
Light distributions	Symmetrical (8°-10°-30°-60-80°) and elliptical beams	
Nominal voltage	220-240V / 50-60Hz	
Surge protection	10kV	

IP 66

GLASS IK 06

PC IK 08

KEY ADVANTAGES

- > Precise on-site photometric distribution via external refractor
- > Discreet 4-colour LED solution or all-white
- > Internal surge protection to shield the electronics from external surges and spikes on the supply
- > Inclination angle indicated on bracket
- > Wide range of operating temperatures

DIMENSIONS | MOUNTING

SCULPFLOOD	60	150
A	147mm 5.8"	94mm 3.7"
B	270mm 10.6"	393mm 15.5"
C	271mm 10.7"	551mm 21.7"
KG	8.5kg 18.7lbs	18kg 39.6lbs

SCULPFLOOD is installed using a graduated fixation bracket.

DECORATIVE

DESIGN HIGHLIGHTS

Monochromatic, RGBW and tunable white LEDs are available.

Dynamic lighting scenarios can be controlled via the DMX-RDM protocol.

SCULPFLOOD enables precise on-site photometric distribution with external refractors.

The range includes two sizes: SCULPFLOOD 60 and SCULPFLOOD 150.

SCULPLINE

Design: Voxdale

MAIN APPLICATIONS

Flexible wall washer for advanced architectural illumination

SCULPLINE is a modern floodlight offering a wall washer effect that can be used for façade or monument illumination.

It enables lighting designers to sculpt the light to create a unique identity for monuments and buildings. SCULPLINE creates a warm ambiance while providing huge energy savings thanks to its powerful LensoFlex®2 photometric engine. It offers a wide palette of colours and lighting effects.

SCULPLINE is designed to create striking lighting effects and enhance the value of architectural buildings at night. Using control systems, dynamic lighting scenarios can be achieved for dramatic results.

		
SCULPLINE	50	100
Typical luminaire output flux (white LEDs)	300 to 5,000lm	100 to 10,000lm
Power consumption	6.2W to 45W	12.5W to 90W
Colour temperature	Warm white (830), neutral white (740 and 840), RGB CW, or tunable white	
Light distributions	Symmetrical (8°-18°-22°-27°), asymmetrical (LensoFlex®2) and elliptical (45°x8° and 140°x108°) beams	
Nominal voltage	220-240V / 50-60Hz	
Surge protection	10kV	
    		

KEY ADVANTAGES

- > Elegant and compact design for minimum impact on architecture
- > Front cover can be customised to perfectly integrate with the environment
- > Broad palette of colours and lighting effects/distributions
- > Numerous (symmetrical and asymmetrical) light distributions
- > Variable number of LEDs from 10 up to 48 LEDs/m
- > Large range of mounting options
- > Low energy consumption

DIMENSIONS | MOUNTING

SCULPLINE	S50	S100	R50	R100
A	65mm 2.5"	65mm 2.5"	105mm 4.1"	105mm 4.1"
B	34mm 1.3"	34mm 1.3"	80mm 3.1"	80mm 3.1"
C	500mm 19.7"	1000mm 39.4"	500mm 19.7"	1000mm 39.4"
KG	1.3kg 2.7lbs	2.6kg 5.7lbs	4.6kg 8.8lbs	7.2kg 15.4lbs

Dimensions and weights are given for surface versions (S) and recessed versions (R).

DESIGN HIGHLIGHTS

With a clean and plain design, the SCULP Collection provides the most accurate range of powerful, versatile and efficient LED floodlights for architectural lighting.

SCULPLINE offers symmetrical and asymmetrical photometric light distributions.

The connections can be made without the need for stripping or special tools.

SCULPLINE is available with monochromatic, RGBCW or tunable white LEDs and can be dynamically controlled.

SCULPLINE offers various types of brackets for flexible mounting: standard compact brackets, wall-mounted extension arms, end clamps and side clamps.

ILUM MARK

MAIN APPLICATIONS

Multi-purpose
range of linear
LED marker
luminaires

The ILUM MARK range is composed of linear marker luminaires fitted with white or RGB low-power LEDs for marker or accent illumination.

These recessed luminaires create original light effects in the nocturnal landscape. They can form dynamic lines of light to guide passers-by and tourists and help them discover a city.

The compact design of ILUM MARK ensures perfect vertical and horizontal integration in all types of structure: on window sills, under arches or on façades to highlight architectural details.

As a versatile ground-lighting solution, ILUM MARK can also be used to show people the way inside underpasses, hospitals or any other building.

ILUM MARK	1	2
Typical luminaire output flux (white LEDs)	100 to 200lm	200 to 500lm
Power consumption	6W	12W
Colour temperature	Warm white (830), neutral white (840), cool white (857) or RGB	
Light distributions	180°	
Nominal voltage	24VDC	

KEY ADVANTAGES

- > Continuous line of light
- > Ultra-compact linear module for discreet integration
- > Extra high tightness level (IP 67)
- > High-quality and resistant materials (IK 10)
- > Dynamic scenarios with DMX512 protocol for RGB versions
- > Easy installation
- > Maximised savings in energy and maintenance costs

DIMENSIONS | MOUNTING

ILUM MARK	1	2
A	35mm 1.4"	35mm 1.4"
B	84mm 3.3"	84mm 3.3"
C	500mm 19.7"	1000mm 39.4"
KG	1.42kg 3.1lbs	2.79kg 6.1lbs

The optical unit is recessed in an aluminium U profile.

DECORATIVE

DESIGN HIGHLIGHTS

ILUM MARK is available in two sizes: 500 or 1,000mm.

ILUM MARK uses 2-pin (white) or 5-pin (RGB) IP 68 connectors.

ILUM MARK is available with white (warm, neutral or cool) or RGB LEDs.

ILUM MARK can form a continuous curtain of light or create 90° angles.

DECORATIVE

TERRA Midi LED

MAIN APPLICATIONS

Powerful
ground
recessed
floodlight for
illumination
and ground
lighting

TERRA Midi LED is a ground recessed floodlight equipped with 8 to 24 high-power LEDs.

Fitted with lenses that offer various types of photometric applications from very concentrated to very diffuse beams as well as asymmetrical LensoFlex®2 lighting distributions, TERRA Midi LED is perfect for lighting the façades of old and contemporary buildings, architectural details, statues and monuments, flags and banners, treetops, bridges, overpasses, etc.

An aluminium body with a round brushed stainless steel frame houses the electrical and electronic accessories as well as the photometric engine. The protector, in tempered glass with a thickness of 15mm, is capable of withstanding a static load of 4,000kg (glass version).

TERRA Midi LED is supplied pre-wired to facilitate assembly and guarantee its high tightness level over time since it is not necessary to open the floodlight.

TERRA Midi LED

Typical luminaire output flux (white LEDs)	900 to 4,800lm
Power consumption	9.7 to 38.1W
Colour temperature	Warm white (730, 830, 835), neutral white (740, 742), cool white 757
Light distributions	Symmetrical (16°-22°-36°-76°) or asymmetrical (105°-129°-140°-156°) beams
Nominal voltage	220-240V / 50-60Hz
Surge protection	10kV

KEY ADVANTAGES

- > Numerous symmetrical and asymmetrical light distributions
- > Precise on-site adjustment
- > Extra-high tightness level (IP 68)
- > High-quality, resistant materials
- > Static load resistance <4,000kg (glass version)

PONTO

MAIN APPLICATIONS

SQUARES &
PEDESTRIAN
AREAS

RAILWAY
STATIONS &
METROS

ACCENT &
ARCHITECTURAL

Various
monochromatic
static versions
for illumination
and ground
lighting

PONTO is a recessed LED floodlight.

It provides a range of light distributions for a variety of solutions including lighting architectural elements or ground-lighting public or private areas.

The synthetic body, which houses the optical compartment, is reinforced with fibre glass and has a stainless steel finishing frame. The power supply is fitted in the body.

The 12mm tempered-glass protector, with its high mechanical resistance, can withstand a static load of 2,000kg. Thanks to these different elements of mechanical design, the luminaire's IP 67 tightness level is maintained in the long term.

PONTO

Typical luminaire output flux (white LEDs)	100 to 300lm
Power consumption	5W
Colour temperature	Warm white 830, neutral white 840, cool white 757, static amber, red, green or blue LEDs
Light distributions	Symmetrical (10°-12°-20°-22°-26°-36°-38°-40°) beams
Nominal voltage	220-240V / 50-60Hz
Surge protection	10kV

IP 67

IK 10

KEY ADVANTAGES

- > Illumination or ground-lighting version
- > Different installation possibilities, with or without a kit
- > Extra-high tightness (IP 67)
- > Available with clear or frosted glass (option)
- > High-quality, resistant materials

DIMENSIONS

BLOCO

MAIN APPLICATIONS

SQUARES & PEDESTRIAN AREAS

CAR PARKS

RAILWAY STATIONS & METROS

ACCENT & ARCHITECTURAL

A versatile tool for marking the way and creating ambiance

The wall recessed BLOCO range is characterised by the wide variety of models, photometric distributions and light sources available.

Rectangular, circular or square, BLOCO perfectly integrates into and complements any architectural setting.

The BLOCO floodlight is composed of high-quality materials: a body and cover in painted die-cast aluminium alloy and a glass protector sealed to the cover. A silicone gasket guarantees the IP 66 tightness level.

BLOCO

Typical luminaire output flux (white LEDs)

Up to 250lm

DESCOBERTAS

DESCRIPTION

The DESCOBERTAS wooden columns contribute to creating a pleasant atmosphere by combining wood and metal. They are available in circular or square variants with lengths ranging from 4m to 8m.

The woods used in our columns are FSC and PEFC certified. For more detailed technical information and the availability of custom variants, please contact your local sales representative.

THYLIA

DESCRIPTION

The uniquely designed THYLIA pole, combined with one of our luminaires (such as TECEO S), has been a Schröder exclusive for many years. The range is perfect for lighting roads, pedestrian areas or squares. The standard offering consists of a base part available in 4 different design materials, combined with straight or curved arms. One, two, three or four poles can be mounted on a base. A faceted steel base and a steel wall bracket are available.

FLEXIA

DESCRIPTION

Created in collaboration with VALMONT Structures, the range of FLEXIA poles complements the FLEXIA luminaires, offering complete lighting ensembles, fully consistent for your applications. Particular care has been taken in the design of this range to ensure the most homogeneous associations possible between the pole, the SOFIA bracket (if applicable) and the FLEXIA luminaire.

The poles are available in different materials (aluminium, galvanised or corten steel, and wood) and with different design options to suit your local needs. The result is an almost infinite number of possible combinations, available in all standard Schréder colours. Certified for the loads defined in the EN40 standard, the FLEXIA POLES range is CE marked.

STYLAGE

DESCRIPTION

The STYLAGE luminaire is offered with a modern column in thermo-formed aluminium (60mm spigot) or a bracket for suspended or post-top mounting. Its aesthetic coherence and elegance characterise this ensemble.

VARIANTS

DIMENSIONS

	3.5m	4m	5m
STYLAGE	X	X	X

Available with a base plate or for ground-recessed mounting.

PERLA

DESCRIPTION

The PERLA's sober and pure line plays an important aesthetic role both by day and at night. Specifically designed for this elegant luminaire, a galvanised steel column is available in various heights, with or without a rear bracket for pavement lighting.

VARIANTS

NUN'ÁLVARES

DESCRIPTION

The NUN'ÁLVARES columns are composed of rectangular profiles with a longitudinal opening at the top of the pole. The large models - with rear bracket - are suitable both for lighting both large avenues and pavements. Available with two bracket sizes, they offer the flexibility to project light onto the road from various distances.

The small models can be installed along streets and squares in city centres. Aesthetic coherence between the suburbs and the city centre is one of the main advantages provided by the NUN'ÁLVARES range.

FUNCTIONAL POLES

DESCRIPTION

With a range of poles combined with a large portfolio of luminaires and brackets, Schröder offers complete light points for your application. The standard pole offering consists of 5 different shapes, with heights ranging from 3 to 14m, made of aluminium or galvanised steel, and always adapted to your local market requirements. The poles can be ordered from Schröder or via one of our local partners. For more detailed technical information and the availability of custom variants, please contact your local sales representative.

The most complete tunnel lighting control system

Jointly developed with Phoenix Contact, the Advanced Tunnel System 4 (ATS 4) is a powerful tunnel lighting control system enabling precise remote dimming and switching of each connected luminaire, based on various tunnel parameter inputs.

This innovative tool can constantly **adapt the lighting levels according to specific tunnel conditions**, such as weather, traffic speed and density, and other sensor inputs such as dirt accumulation, wall reflectance, etc. **It monitors the power consumption and reports any failures.**

As the system integrates the initial tunnel lighting study and uses the industrial BUS for individual auto-addressing, **the ATS speeds up the commissioning process, saving valuable time and resources on-site.**

KEY ADVANTAGES

- > **Improve reactivity to any sudden changes in the tunnel**
- > **Maximise energy savings thanks to highly efficient dimming**
- > **Easy to install and configure**
- > **Reduce commissioning time significantly (up to 75%)**
- > **Reduce on-site interventions**
- > **Compliant with the highest cybersecurity standards (NIS EU 2016/1148 - IEC62443)**

1
CREATE SAFE ENVIRONMENTS FOR USERS

2
ENABLE MOBILITY

3
DESIGN SUSTAINABLE TUNNELS

4
GENERATE SIGNIFICANT TIME AND COST SAVINGS

Click for more information 

Based on Industry 4.0 technologies

- Modbus cloud/ industrial bus safety-related data management system**
- ✓ Real-time tunnel data analysis
 - ✓ Lighting component maintenance management

- Tunnel Control System (TCS 4/ATS 4)**
- ✓ Mapping luminaires
 - ✓ Data visualisation
 - ✓ Emergency scenarios
 - ✓ Luminance sensor reading
 - ✓ Alarm function
 - ✓ Customisable

- L20 luminance meter**
- ✓ Luminance measurement
 - ✓ Data reporting to ATS

L20 luminance meter

- Lumgate RS422 closed loop device**
- 
- ✓ Light switching and dimming
 - ✓ Luminaire failure reports
 - ✓ CE and UL compliant

Tunnel lighting control solution over a DALI network protocol

Provides the essential control functions of the ATS 4 in a **lean feature set**.

Enables **coordinated dimming and switching** of groups of luminaires for even more **savings**.

Equipped with a fully featured **powerful lighting control software**. No additional interface is required.

The ideal **solution** for basic tunnels or interior zones of long tunnels.

✓ Optimised installation

The ATS 4 DALI cabinet constantly communicates with the ATS 4 DALI boxes. Equipped with multiple DALI outputs (up to 8 DALI masters), the DALI boxes send commands to or receive data from groups of luminaires. This type of system architecture provides an optimised solution for specific tunnel needs.

✓ Standard cabling

The ATS 4 DALI benefits from a complete set of toolless standard cables and quick-on connectors, considerably speeding up cabling and saving valuable time on-site.

COMMUNICATION TYPE	DALI network	Industrial bus communication
INSTALLATION TYPE	Luminaires/driver box equipped with DALI drivers	Luminaires/driver boxes equipped with Lumgate
LIGHTING CONTROL	Broadcast command (one order per luminaire segment)	Individual control (one order per luminaire)
MAINTENANCE	Group failure indication	Precise failure location
CABLE TYPE	Standard cables	Bus communication cables
MAX. CIRCUIT CABLE LENGTH	Up to 300m per entire segment	Up to 400m between two devices
INSTALLATION	Toolless plug-and-play system	
SYSTEM CAPACITY	2 to 8 DALI masters per ATS 4 DALI box	240 Lumgates per ATS 4
IDEAL FOR	Basic tunnels or interior zones	Complex tunnel architecture or entrance areas

TFLEX

MAIN APPLICATIONS

TUNNELS &
UNDERPASSES

The all-
rounder
powerful
tunnel lighting
platform

TFLEX is a revolutionary, modular-based platform for an enhanced road tunnel lighting experience.

TFLEX provides optimised, energy-efficient solutions for the various typical tunnel zones from entry to exit, taking into account all design factors and traffic conditions that affect safety, notably traffic characteristics, types of user, tunnel length and geometry.

An advanced, fully integrated system with lighting and control, it guarantees the lowest energy consumption while respecting the most stringent tunnel lighting requirements and standards.

With the latest digital and optical technology, TFLEX ensures high visual performance for an improved driving experience.

TFLEX	BASE	MODULE 1 COMBI 1	MODULE 2 COMBI 2	MODULE 3 COMBI 3
Typical luminaire output flux (range)	3,200 to 21,500lm	13,000 to 33,000lm	19,600 to 66,000lm	69,700 to 91,000lm
Power consumption	22.9W to 135W	86W to 254W	128W to 508W	508W to 624W
Colour temperature	Neutral white 740			
Nominal voltage	220-240V / 277V / 347-480V / 50-60Hz			
Surge protection	10 / 20kV			

KEY ADVANTAGES

- > **Flexibility:** modular approach with wide range of lighting distributions
- > **Compact, lightweight and easy to install**
- > **Two electrical circuits for enhanced dimming possibilities, optimised power factor and longer lifespan**
- > **High-power LED solution to replace HID luminaires in the entrance and interior zones**
- > **Separate housings for gear (DRIVE) and optical units (MODULE/COMBI) for optimised thermal management in high-power applications**
- > **Tool-free access for easy maintenance**

DESIGN HIGHLIGHTS

The TFLEX platform is built around a tool-free philosophy for opening/closing as well as power, control and internal cabling.

The preassembled tool-free fire-rated cables and connectors used for TFLEX reduce installation time and improve quality and reliability.

Designed with two electronic circuits, TFLEX enables constant dimming with an optimised power factor.

The TFLEX range offers various mounting options for ceiling or wall mounting with fixed or tiltable fixations.

MOUNTING OPTIONS

BASE - 4 slots for tie-rod mounting

BASE - short bracket

BASE - long bracket

BASE, COMBI & MODULE - Hook fixation

BASE - Adjustable fixation 3G compliant

COMBI & MODULE - standard fixed brackets

COMBI & MODULE - adjustable swivelling mounting

COMBI & MODULE - pull-out swivelling wall mounting

COMBI & MODULE - adjustable swivelling wall mounting

COMBI - pull-out swivelling suspended mounting

TFLEX STS

MAIN APPLICATIONS

TUNNELS & UNDERPASSES

Modular-based, highly corrosion-resistant tunnel lighting solution

TFLEX STS is a modular-based lighting solution designed for enhancing and securing the road tunnel driving experience in highly-corrosive environments.

Made of highly corrosion-resistant stainless steel, TFLEX STS COMBI provides a powerful yet robust solution for tunnels with harsh environments.

TFLEX STS COMBI offers an advanced, fully integrated system with lighting, cabling and control, guaranteeing the lowest energy consumption while respecting the most stringent tunnel lighting requirements and standards.

TFLEX STS	BASE 40	COMBI/MODULE 40	COMBI/MODULE 60	COMBI/MODULE 100

TFLEX LINE

MAIN APPLICATIONS

TUNNELS &
UNDERPASSES

The complete
solution for
continuous
tunnel lighting

TFLEX LINE has been developed as the continuation of the TFLEX tunnel solution, offering a continuous LED line designed to provide perfect visual guidance in the most complex tunnel zones with maximum efficiency.

With its slim-line design and linear-shaped light sources, TFLEX LINE is the perfect replacement for fluorescent tubes. Its improved photometric engines lead to unrivalled visual performance, creating perfect light uniformity everywhere in the tunnel while significantly reducing energy consumption.

This continuous LED line is available in various lengths with multiple photometric distributions, making it suitable for any kind of tunnel project.

TFLEX LINE is a complete solution, available with integrated connectors and deliverable with a set of preassembled cables in custom lengths to fit any tunnel length and geometry.

TFLEX LINE	60	120	200

TAG

MAIN APPLICATIONS

TUNNELS &
UNDERPASSES

Powerful tunnel lighting solution

TAG takes advantage of the latest innovations to offer a compact, lightweight, easy-to-install, versatile and powerful tunnel lighting solution.

With TAG, Schröder is exploiting the full potential of the latest digital technology to improve tunnel environments. The flat, compact and robust mechanical design of the TAG minimises mounting constraints and ensures that the optical units occupy little space in the tunnel ceiling.

The TAG range is not only designed to reduce investment. It is also optimised to provide state-of-the-art lighting that guarantees a safe and comfortable driving experience for motorists with significant energy and maintenance savings for tunnel operators.

TAG benefits from Schröder's long-standing expertise in tunnel lighting. This new range is fully compliant with the most stringent standards and can be managed by the Advanced Tunnel control System (ATS) from Schröder, to offer the biggest savings while providing an optimal experience for drivers.

TAG	1	2
Recommended installation height	4 to 6m / 13' to 20'

CONTILED

MAIN APPLICATIONS

TUNNELS &
UNDERPASSES

Continuous LED line for tunnel lighting

CONTILED is designed to provide a beneficial alternative to luminaires fitted with fluorescent lamps for continuous line lighting in tunnels and underpasses.

It not only provides the required lighting levels with significant energy savings but also great visual comfort to guide motorists safely.

CONTILED is an IP 66 sealed optical unit, offering variable combinations of modules equipped with 8 to 64 LEDs and various optics, to be combined with a remote driver box. It has been designed to meet the specific needs of many different tunnel applications.

The LED modules are located on an internal slider, which can be easily removed, allowing replacement at the end of its service life in order to take advantage of future technological improvements.

GL2 COMPACT

MAIN APPLICATIONS

TUNNELS &
UNDERPASSES

INDUSTRIAL
HALLS &
WAREHOUSES

Compact,
powerful and
efficient LED
lighting
solution

GL2 COMPACT offers a unique combination of features in a slender housing for lighting the entrance, threshold and interior zones of a tunnel.

Available in five sizes and with various lumen packages, GL2 COMPACT offers high resistance to water, dust ingress and impacts.

The photometry of GL2 COMPACT can be either symmetrical or asymmetrical to adapt to the tunnel layout. This lighting solution offers uniform lighting and superior visibility in critical areas such as the entrance and exit zones of a tunnel.

GL2 COMPACT offers several mounting possibilities. For example, it can be fixed directly onto a cable rack.

The photometry can be adjusted on-site thanks to a tiltable bracket.

GL2 COMPACT guarantees long-lasting performance with minimum maintenance.

GL2 COMPACT	1	2	3	4	5
Typical luminaire output flux (range)	2,300 to 4,700lm	4,600 to 9,400lm	6,900 to 14,100lm	9,200 to 18,800lm	11,500 to 28,200lm

GL2 COMPACT is proposed with various direct and swivelling mounting options.

TLI

MAIN APPLICATIONS

A range
of tunnel
luminaires
made
entirely of
stainless steel
and glass

TLI is a range of tunnel luminaires designed for performance, flexibility and ease of installation.

This range of luminaires provides the ideal solution for extremely corrosive environments and in countries where legislation imposes the use of stainless steel housings. Drivers, surge protection and control devices are integrated into a luminaire characterised by a high degree of ingress protection and impact resistance.

Available in two sizes (TLI 1 and TLI 4), TLI enables the number of LEDs to be adjusted, starting from 16 up to a maximum of 144 LEDs.

This range is suitable for surface mounting on the ceiling or wall with brackets.

		
TLI	1	4
Typical luminaire output flux (range)	1,200 to 9,100lm	5,300 to 18,500lm
Power consumption	11W to 74W	43W to 133W
Colour temperature	Neutral white 740	
Nominal voltage	220-240V / 50-60hz	
Surge protection	10kV	

  IP 66 IK 08

KEY ADVANTAGES

- > High-power LED solution to replace HID luminaires in the entrance and interior zones
- > Available in two sizes and in various configurations to cover all tunnel lighting requirements
- > LensoFlex^{®2} and ReFlexo™ (counter beam lighting) photometric engines to provide flexible solutions
- > Designed for long-lasting performance: high level of protection against corrosion and impacts
- > Two electrical circuits for enhanced dimming possibilities, optimised power factor and longer lifespan

FV32 LED

MAIN APPLICATIONS

TUNNELS &
UNDERPASSES

A flexible
tool to light
all areas of a
tunnel

FV32 LED provides flexible solutions to meet the tunnel lighting requirements for different enclosed areas.

A wide range of photometric distributions make the FV32 LED range the ideal instrument for lighting town and motorway tunnels or underpasses.

The extruded aluminium profile enables the number of LEDs to be adjusted in multiples of 8, starting from 16 up to a maximum of 240 LEDs.

Drivers and electrical connections are integrated into the luminaire. The protector opens to give tool-free access to the components when the luminaires are installed.

FV32 LED	0	1	2	3
Typical luminaire output flux (range)	3,000 to 7,800lm	4,500 to 15,600lm	9,000 to 31,100lm	16,500 to 47,000lm
Power consumption	21.5W to 62W	31.1W to 120W	62W to 240W	109W to 360W
Colour temperature	Warm white 730 or Neutral white 740			
Nominal voltage	120-277V / 220-240V 50-60hz			
Surge protection	10 / 20kV			

UL 508
CSA C22.2
No. 250.6

IP 66

IK 08

KEY ADVANTAGES

- > Adapted to a wide range of different tunnel applications to provide safety at all times
- > LensoFlex®2 and ReFlexo™ (counter beam lighting) photometric engines to provide flexible solutions
- > High level of protection against corrosion, impacts and vibrations
- > Various inclination possibilities on-site for optimal photometry
- > Control system: can be adapted to customer requirements or integrated into a tunnel backbone system

DIMENSIONS | MOUNTING

FV32 LED	0	1	2	3

INDU BAY GEN3

MAIN APPLICATIONS

INDUSTRIAL
HALLS &
WAREHOUSES

LARGE
AREAS

SPORT
FACILITIES

CAR PARKS

Setting the
benchmark
in high-bay
lighting

With the 3rd generation INDU BAY, Schröder offers the leading luminaire for lighting industrial facilities with a minimised total cost of ownership.

More efficient, light, versatile, designed for the requirements of specific industries (metal, automotive, food and beverage, etc.) and smart, it delivers the best solution on the market today for high-bay applications.

It outperforms all other fixtures thanks to the substantial energy savings it generates and the performance it delivers over time.

Available with various lumen packages, light distributions and mounting options, INDU BAY adapts the lighting to meet the specific needs of your environment.

It not only lowers your investment. It maximises it by providing a comfortable environment for your staff while limiting energy consumption to what is absolutely necessary.

INDU BAY GEN3	1	1 HT	2 HT	2
Recommended installation height	4 to 12m / 13' to 39'			
Typical luminaire output flux (range)	15,500 to 21,100lm	9,800 to 10,700lm	22,600 to 24,900lm	25,800 to 32,100lm
Power consumption	115W to 140W	70W	150W	185W to 210W
Colour temperature	Neutral white 840 or cool white 857			
Nominal voltage	220-240V / 50-60hz			
Surge protection	2 / 4 / 6kV			

KEY ADVANTAGES

- > One-to-one replacement for HID fixtures from 40W to 400W
- > Light-on-demand feature with optional motion sensor
- > Emergency lighting with optional battery
- > High visual comfort
- > Compact housing optimised for heat dissipation and reduced dust accumulation
- > Dedicated range of mounting accessories
- > INDU BAY HT variant providing a dedicated solution for extremely hot environments
- > Compatible with Schröder's indoor and outdoor control system

DIMENSIONS | MOUNTING

INDU BAY is delivered with a hook for a suspension chain (not included). A fork mounting system enables the luminaire to be inclined on-site for precise adjustment.

DESIGN HIGHLIGHTS

INDU BAY is equipped with a graduated U-bracket for precise on-site setting.

In case of an emergency, an optional auxiliary battery can power the INDU BAY for 3 hours to provide safety lighting.

INDU BAY HT offers a dedicated solution for extremely hot environments.

INDU BAY can be equipped with a motion sensor for light-on-demand scenarios.

INDU CONTILINE GEN2

MAIN APPLICATIONS

INDUSTRIAL
HALLS &
WAREHOUSES

Modular,
efficient
and easy to
assemble

INDU CONTILINE is a fully flexible 13 pole trunking system with tool-free module installation. With 2.25m trunking inserts and suspensions that can be mounted with a distance of up to 5m it can be installed in a fast and efficient manner.

With its unique, optional roof accessory, INDU CONTILINE is considerably more resistant to dust and water accumulation. Thanks to its additional, integrated cable duct, this system is IoT-ready!

INDU CONTILINE can be installed from the ground using a patented process. It facilitates mounting if the area for the elevator / scissor platform cannot be cleared or if the floor has not yet been cleared for traffic.

This patented process can also be used to your advantage on accessible crane systems without additional scaffolding.

INDU CONTILINE offers additional benefits including emergency lighting with an auxiliary battery and optimal light distribution with low glare to create optimal working conditions in industrial environments.

INDU CONTILINE GEN2	1	2
Typical luminaire output flux (range)	7,400 to 12,400lm	14,800 to 21,200lm
Power consumption	50W to 77W	100W to 133W
Colour temperature	Neutral white 840, cool white 857 or very cool white 865	
Nominal voltage	220-240V AC – 50-60Hz 176-275V DC	
Surge protection	1 / 2 / 4kV	

KEY ADVANTAGES

- > High efficiency with low operating costs
- > High visual comfort
- > Quick and easy tool-free installation
- > Versatility in lighting design with various distributions
- > Designed for surface or suspended mounting with dedicated mounting accessories

DIMENSIONS | MOUNTING

INDU CONTILINE GEN2	2.1	2.2
A	1410mm 55.5"	2253mm 88.7"
B	36mm 1.4"	36mm 1.4"
C	78mm 3.1"	78mm 3.1"
KG	1.7kg 3.7lbs	3kg 6.6lbs

DESIGN HIGHLIGHTS

The INDU CONTILINE GEN2 trunking system offers versatility and openness to meet the requirements of any project

The main feed can be placed in the centre or at the extremity of the trunk.

The T13 block enables versatile positioning of the LED modules and combines power and control connections.

In case of an emergency, an optional auxiliary battery provides 3 hours of safety lighting.

The system can power auxiliary fixtures or any other device useful in an industrial environment.

INDU LINE GEN4

MAIN APPLICATIONS

INDUSTRIAL
HALLS &
WAREHOUSES

SPORTS
FACILITIES

CAR PARKS

Efficiency and
comfort for
any industrial
environment

INDU LINE offers a robust and efficient LED alternative for replacing fixtures fitted with T5/T8 fluorescent tubes.

Designed to perform in harsh industrial environments, INDU LINE GEN4 has a robust, compact mechanical design that makes it highly resistant and easy to install in any kind of infrastructure. Whether in sports facilities, warehouses, manufacturing plants with dusty or wet conditions, corridors, underground car parks, or underpasses, INDU LINE GEN4 offers a reliable lighting solution. Available in various materials, this luminaire meets any type of local requirement or legislation.

With a lifetime 5 times longer than a fluorescent tube, this modern linear LED luminaire lowers the total cost of ownership of a lighting installation with the guarantee of high efficiency.

INDU LINE GEN4 creates safe and comfortable working conditions thanks to its low glare and high colour rendering index to optimise productivity.

INDU LINE GEN3	1	2	3
Recommended installation height	4 to 6m / 13' to 20'		
Typical luminaire output flux (range)	3,100 to 3,400lm	3,400 to 8,500lm	4,200 to 10,800lm
Power consumption	24W	22W to 61W	27W to 77W
Colour temperature	Neutral white 840		
Nominal voltage	220-240V / 50-60Hz		

KEY ADVANTAGES

- > LED alternative for fixtures equipped with fluo T5/T8 lamps
- > Cuts energy costs by up to 50%
- > Easy installation and maintenance free
- > Light-on-demand feature with optional motion sensor
- > High luminaire efficiency
- > Efficient, uniform and glare-free light
- > Emergency lighting with optional battery
- > Long service life
- > On-site lighting adjustment via driver's integrated DIP switch

CAR PARKS

Flexible and
beneficial LED
alternative to
fluorescent
tubes

Combining robustness, efficiency and flexibility, MY1 LED is a sustainable alternative to fluorescent tubes for lighting indoor areas such as industrial halls, warehouses, tunnels and car parks.

Thanks to its modern and elegant design, MY1 LED creates a visually appealing environment while offering safety and visual comfort.

Designed to provide operational benefits for site managers, this state-of-the-art LED linear lighting solution is characterised by its long lifetime, high efficiency, minimised energy costs, maintenance-free requirements and quick installation.

MY1 LED	1	2	3	4	5	6
Recommended installation height	3 to 8m / 10' to 26'					
Typical luminaire output flux (range)	1,400 to 2,000lm	2,500 to 3,700lm	3,700 to 5,600lm	5,400 to 8,100lm	6,200 to 9,500lm	7,200 to 11,100lm
Power consumption	20.4W	33.2W	46.5W	70W	76W	87W
Colour temperature	Warm white 830 or neutral white 740					
Nominal voltage	220-240V / 50-60hz					
Surge protection	4 / 10kV					

KEY ADVANTAGES

- > Robust luminaire to replace fixtures with T5/T8 fluorescent tubes
- > 6 different sizes
- > Extra high tightness level (IP 67)
- > Tool-free access for easy maintenance
- > Full scope of photometries (narrow to wide symmetrical as well as asymmetrical)
- > Versatile mounting options
- > Retrofit kit available for previous generations of MY1 luminaires

DIMENSIONS | MOUNTING

KG	5.6kg 12.3lbs	8.8kg 19.4lbs	16.8kg 37lbs

Ø60mm
Ø76mm

Fork enabling the inclination to be adjusted. Optional post-top mounting.

DESIGN HIGHLIGHTS

The universal U-bracket includes a graduation system for precise on-site setting.

INDU FLOOD provides easy access to the gear compartment.

The floodlight includes two cable glands at the back (in and out) for a daisy chain layout. It is designed for integration with building management systems (DALI 2.0 or 1-10V protocol).

As an option, INDU FLOOD can be equipped with a sensor (motion and daylight) for light-on-demand scenarios.

The post-top mounting enables easy adjustment of the tilt angle of the luminaire on site.

INDU FLOOD GEN2 offers post-top mounting with an optional adapter.

INDU PANEL

MAIN APPLICATIONS

INDUSTRIAL
HALLS &
WAREHOUSES

RAILWAY
STATIONS &
METROS

SPORT
FACILITIES

For
comfortable,
safe yet
energy-
efficient
indoor lighting

INDU PANEL provides a beneficial LED alternative to luminaires with fluorescent lamps. With its square or rectangular shape, it offers uniform and comfortable lighting for typical indoor venues such as reception areas, offices, conference rooms, corridors and lifts.

This well-designed LED system has the potential to replicate sunlight more accurately than fluorescent bulbs.

INDU PANEL provides managers with the right tool to boost people as it provides light that helps to stimulate the brain and subsequently improve concentration. It contributes to a brightly-lit environment that creates a happier, healthier workforce, which is in turn more productive and likely to stick around.

			
INDU PANEL	1	2	3
Typical luminaire output flux (range)	3,400lm	3,200lm	3,700lm
Power consumption	30W		
Colour temperature	Neutral white 840		
Nominal voltage	220-240V / 50-60hz		
Surge protection	3kV		
		IP 20	IK 02

KEY ADVANTAGES

- > White light with a high colour rendering index
- > 2 sizes for flexibility
- > Elegant design for low height installation
- > Low power consumption
- > Easy installation and maintenance free
- > Efficient, uniform and glare-free light

OMNISTAR

MAIN APPLICATIONS

Designed to bring massive savings and benefits to area lighting

OMNISTAR provides a beneficial lighting solution in a variety of indoor and outdoor applications such as tunnels, docks, industrial buildings, sport facilities, large car parks and airports.

This platform has been designed to provide an unrivalled combination of performance and flexibility for lighting areas where high lumen packages are needed with the added advantages of a LED solution: low energy consumption, improved visibility with white light, limited maintenance and longer life.

OMNISTAR can be installed in various configurations (suspended, surface-mounted or post-top) with one to three optical units. OMNISTAR can operate with a large range of outdoor and tunnel control solutions (daylight sensors, dimming, remote management, ATS 4) and a building management system with the DALI protocol to further maximise energy savings by adapting the lighting levels according to the real needs of the place to be lit.

OMNISTAR	1 optical unit
Recommended installation height	8 to 45m / 26' to 148'
Typical luminaire output flux (range)	7,800 to 80,800lm
Power consumption	75W to 594W
Colour temperature	Warm white (730 and 830), neutral white (740 and 940) or cool white (757 and 957)
Nominal voltage	220-240V / 120-277V / 347-480V 50-60Hz
Surge protection	10kV

KEY ADVANTAGES

- > Real beneficial LED alternative to HID floodlights for high-power applications
- > Flexibility: modular approach with wide range of lighting distributions
- > Highly efficient light distributions reduce the quantity of luminaires to be installed
- > Various mounting options and inclination possibilities on-site for optimal photometry

Complete, powerful lighting solution, dedicated to industrial and large area applications

OMNISTAR KIT is a combination of the powerful OMNISTAR optical unit and the innovative gear box – the OMNIBOX. Available in three versions, these luminaires offer a modular and powerful LED lighting solution for applications such as warehouses, high bays, tunnels, sports arenas, airports, car parks and large areas.

OMNISTAR KIT luminaires have been designed to provide unrivalled photometric performance for lighting areas where high lumen packages are needed, while benefiting from all the advantages of an economical LED solution: reduced energy consumption, limited maintenance and fast return on investment.

C	320mm 12.6"	398mm 15.7"	500mm 19.7"
KG	3.4kg 6.6lbs	7.7kg 15.4lbs	19kg 42lbs

Mounting by means of a fork enables the inclination to be adjusted on-site.

LARGE AREA & FLOOD

OMNIFLOOD

Design: AF Lighting

MAIN APPLICATIONS

LARGE AREAS

ACCENT & ARCHITECTURAL

BRIDGES

SPORT FACILITIES

INDUSTRIAL HALLS & WAREHOUSES

BIKE & PEDESTRIAN PATHS

ROADS & MOTORWAYS

Versatility to light all types of public and private facilities

The aesthetic design of OMNIFLOOD, in combination with a wide range of sizes, optical and mounting options, make it very versatile and thus the perfect choice for lighting recreational sports areas, industrial areas, campuses, business parks, car parks, building facades and billboards.

OMNIFLOOD is the ideal tool to replace a range of floodlights equipped with traditional discharge lamps of 50 to 400W.

The OMNIFLOOD range combines the energy efficiency of LED technology with the photometric performance of the LensoFlex[®]2 and BlastFlex[™] concepts developed by Schröder.

OMNIFLOOD	1	3
Recommended installation height	4 to 12m / 13' to 39'	
Typical luminaire output flux (range)	1,800 to 6,200lm	5,600 to 28,200lm
Power consumption	18.9W to 53W	52.5W to 227W
Colour temperature	Warm white 730 or neutral white 740	
Nominal voltage	220-240V / 50-60Hz	
Surge protection	10kV	

KEY ADVANTAGES

- > One-to-one replacement for 50W to 400W HID floodlights
- > Large energy savings compared to systems with traditional discharge lamps
- > Precise light control with LensoFlex^{®2} and BlastFlex™ photometric engines
- > FutureProof: smart upgradability

DIMENSIONS | MOUNTING

OMNIFLOOD	1	3

C	311mm 12.2"	475mm 18.7"
KG	9kg 19.8lbs	18.4kg 40.5lbs

Ø60mm
Ø76mm

Versatile fork enabling the inclination to be adjusted by 60 degrees (-30° to +30°).

ASTRAL SLIM

MAIN APPLICATIONS

RAILWAY
STATIONS &
METROS

CAR PARKS

INDUSTRIAL
HALLS &
WAREHOUSES

SPORT
AREAS

Creating
safety
and ambiance
in enclosed
areas

Combining design, efficiency and modularity, ASTRAL SLIM is a great alternative to fluorescent tubes for continuous or discontinuous lighting in enclosed areas such as train and metro stations, airports, shopping centres or any other indoor applications where the safety and well-being of the users are critical.

Thanks to its sleek and elegant housing, ASTRAL SLIM contributes to the creation of a visually appealing environment with uniform, low-glare lighting that gives a real sense of safety and offers superior visual comfort.

Designed to provide operational benefits for site managers, this state-of-the-art LED linear lighting solution is characterised by its high efficiency, reduced energy consumption, minimal maintenance requirements and easy installation.

ASTRAL SLIM

Recommended installation height	3 to 8m / 10' to 26'
Typical luminaire output flux (range)	1,500 to 4,000lm
Power consumption	13.9W to 38.1W
Colour temperature	Neutral white 840
Nominal voltage	220-240V / 50-60hz

IP 66

IK 08

KEY ADVANTAGES

- > Compact design
- > Aesthetic design
- > Excellent uniformity of illuminance
- > Beneficial LED alternative to T5/T8 fluorescent tubes
- > Superior visual comfort (low glare)
- > Tool-free installation and plug-and-play connections
- > Modular design with custom housing offers a number of optical units and control options (master and stand-by configurations)
- > Integrated cable tray
- > Fire-resistant materials

DIMENSIONS | MOUNTING

ASTRAL SLIM

A 6000mm | 236.2"

B 133mm | 5.2"

C 278mm | 10.9"

KG 43kg | 94.6lbs

ASTRAL SLIM is designed for suspended, surface or recessed mounting in a ceiling.

Schröder

Make life easy with the Schröder ITERRA control system

The must-have lighting control solution for sports facilities

▶ LET'S GET EASY. LET'S GET WIRELESS.

No extra cabling, no PLC, no complicated commissioning process. Schröder ITERRA is the **100% wireless control system for indoor and outdoor** sports facilities. Based on a Bluetooth™ mesh network, it offers a real **plug-and-play solution** able to control all luminaires and floodlights using standard DALI, DALI-2 or 0-10V/1-10V protocols.

▶ ONE TOUCH, GREAT EXPERIENCE.

A mobile app-based system, Schröder ITERRA is very **easy to operate** with a tablet or smartphone. It comes with an **intuitive visual interface** that users can quickly personalise to the layout and settings of their lighting installation. Through differentiated user rights, managers can decide on access to system features and lighting scenarios according to the profile of the individual.

With Schröder ITERRA, it is easy to provide the right light (light distribution, intensity, colour temperature and theatrical effects) at any time to energise athletes and spectators while ensuring **safety, accuracy and visual comfort**.

▶ SERIOUSLY SMART

Although the Schröder ITERRA control solution is extremely user-friendly, it is based on state-of-the-art, efficient technologies to offer maximum flexibility and savings for a quick return on investment. As an **ecosystem based on leading industry standards**, it ensures compatibility with future developments and extensions. Firmware updates are automatically supported by the application. Schröder ITERRA is a **must-have** for sports facility managers who want to maximise the benefits with the utmost peace of mind.

Minimum hardware, **maximum flexibility**

The Schröder ITERRA control solution is characterised by a minimal footprint and excellent flexibility for on-site installation.

ITERRA DYNAMIC SWITCH

Transforming any basic switch into a smart command, programmable with the Schröder ITERRA application

ITERRA MODULE NODE

Indoor module converting a wired DALI/0-10V signal into BLE wireless communication

ITERRA GATEWAY

Control your complete Schröder ITERRA lighting system via the cloud with an internet connection

ITERRA XPRESS

Physical remote control configurable with the Schröder ITERRA application

ITERRA ZHAGA NODE

Plug-and-play node for mounting on a standard Zhaga Book 18 socket

ITERRA BASICBOX

Cabinet centralising DALI wired connections and equipped with a NEMA 7-pin socket

ITERRA NEMA NODE

Plug-and-play node for mounting on standard NEMA 7-pin sockets (BASICBOX or luminaire)

SCHRÉDER ITERRA APP TO MANAGE YOUR COMPLETE INSTALLATION

An intuitive and easy-to-use application on any mobile device (smartphone or tablet, Android or iOS) allows you to control your entire lighting installation and manage multiple areas, from indoor to outdoor lighting.

**Perform.
Play.
Win.**

- Quick and easy implementation
- Open technologies and standards
- Outstanding user experience
- Futureproof solution
- Cost-effective control system
- Additional energy savings & increased lifetime of luminaires
- Remote and physical control, data monitoring and preventive maintenance
- Management of user rights for a variety of user profiles

ECOBLAST

MAIN APPLICATIONS

SPORTS
AREAS

LARGE
AREAS

Smart
modular
solution for
sports lighting

ECOBLAST is a range of high-performance floodlights designed to provide the right light in indoor and outdoor sports venues as well as other large areas where high lumen packages and razor-sharp lighting distributions are needed.

This modular solution offers beneficial alternatives to floodlights equipped with 1000W, 1500W or 2000W discharge lamps. Thanks to its versatile mounting system, ECOBLAST is fully compatible with existing infrastructure for retrofit projects. The modular approach optimises the weight and lowers aerodynamic resistance to minimise the mechanical stress on the supporting structure.

Equipped with the latest generation of photometrical engines, ECOBLAST stands out with cutting-edge distributions to offer perfect uniformity and superior visual comfort for players, spectators and neighbours (low glare and minimised light spill). ECOBLAST is the ideal tool to comply with sports federations and international regulations. With its DALI2 and DMX-RDM options, ECOBLAST is fully compatible with the ITERRA remote control system.

ECOBLAST	3	4	5	6
Recommended installation height	8 to 50m / 26' to 164'			
Typical luminaire output flux (range)	56,900 to 112,700lm	75,900 to 150,300lm	94,900 to 187,900lm	114,000 to 225,500lm
Power consumption	680W to 910W	900W to 1,210W	1,130W to 1,520W	1,350W to 1,820W
Colour temperature	Warm white (730), neutral white (740 and 840) or cool white (757, 857 and 957)			
Nominal voltage	220-240V / 277V / 347V / 400V 50-60Hz			
Surge protection	10kV			

KEY ADVANTAGES

- > Fully compatible with existing infrastructure (mounting and cabling) in retrofit projects
- > Flexibility: modular approach for high-power applications
- > Versatile mounting: remote gear box or fixed to the floodlight
- > Compliant with international sports federation regulations
- > Optimised glare control
- > Inclination angle adjustable on-site for each row of modules and/or the complete bracket
- > Instant on/off and entertainment mode to create dramatic/theatrical effects

DIMENSIONS | MOUNTING

KG with glass protector	20.5kg 44.1lbs	29.1kg 63.9lbs	33.1kg 72.8lbs	36.9kg 79.4lbs

DESIGN HIGHLIGHTS

ECOBLAST is a modular solution with up to 6 modules, including tilt settings on the whole ensemble and per row of modules.

The ECOBLAST bracket offers two positions for the structure supporting the modules: front or rear.

The universal mounting part on the ECOBLAST bracket is designed to comply with existing infrastructure for retrofit projects.

ECOBLAST offers maximum flexibility with a gear box that can be mounted on the bracket or remotely at a distance of up to 200m.

To maintain performance over time, ECOBLAST has been designed to optimise heat dissipation.

The ECOBLAST modules are available with a polycarbonate or glass protector.

Versatile
and efficient
lighting
solution for
outdoor sports
facilities

The BRITELINE GEN2 floodlight offers a versatile and effective solution for lighting outdoor sport facilities and large areas where energy efficiency is a must.

With its innovative design comprising adjustable and corrosion-resistant modules, this floodlight offers unparalleled versatility and precise configuration to accommodate any existing setup while ensuring accurate photometry.

Equipped with high-performance LED engines, BRITELINE GEN2 stands out by delivering exceptional performance at affordable costs. Its light distributions and backlighting options not only provide outstanding visibility but also adhere to strict environmental standards, meeting light pollution regulations and dark sky requirements.

Compatible with the Schröder ITERRA control system, BRITELINE GEN2 provides intelligent and intuitive lighting, elevating recreative sports and outdoor floodlighting to unprecedented levels.

OMNIBLAST

MAIN APPLICATIONS

SPORTS
AREAS

LARGE
AREAS

ACCENT &
ARCHITECTURAL

Unrivalled
combination
of
performance
and flexibility

OMNIBLAST is the ideal tool for sports venues and other very large area applications that require a lighting solution with the highest efficiency and flexibility to adapt to the different lighting needs.

OMNIBLAST ensures high horizontal and vertical lighting levels to meet the strict requirements of sports federations and TV broadcasting.

A modular concept of optical units means that 1, 2 or 3 modules can be mounted on the same bracket to offer the utmost versatility, providing light distributions and lumen packages perfectly adapted to the specifications of the area to be lit.

To enhance the on-site experience and television images, OMNIBLAST guarantees perfect glare control, a high CRI and television lighting consistency index (TLCI) as well as flicker-free lighting. OMNIBLAST benefits from various dimming options and ensures theatrical effects.

OMNIBLAST	1	2	3
Recommended installation height	8 to 50m / 26' to 164'		
Typical luminaire output flux (range)	18,600 to 64,800lm	34,500 to 129,700lm	54,900 to 194,600lm
Power consumption	244W to 618W	488W to 1,160W	1740W
Colour temperature	Warm white (830), neutral white (740 and 940), cool white (757 and 957), NCW+Amber or RGB CW		Warm white (830), neutral white (740 and 940) or cool white (757 and 957)
Nominal voltage	120-277V / 220-240V / 347-480V / 50-60Hz		
Surge protection	10 / 20kV		

KEY ADVANTAGES

- > Cost-effective and efficient to maximise energy and maintenance savings
- > Flexibility: modular approach for high-power applications
- > Compliant with international sports federation regulations
- > High Colour Rendering Index (CRI) and Television Colour Consistency (TLCI)
- > Compliant with UHD/HD/4K broadcast and super slow-motion replays (flicker-free)
- > Instant on/off and entertainment mode to create dramatic/theatrical effects
- > Optimised glare control

LARGE AREA & FLOOD

DESIGN HIGHLIGHTS

OMNIBLAST takes advantage of patented cooling technology for sustainable performance.

Each module can be tilted individually up to 40° (+20°/-20°).

The lightweight yet robust bracket for 2 or 3 modules incorporates various settings.

OMNIBLAST offers a wide range of accessories (brackets, louvers, hoods, etc.)

With its tunable white or RGB LEDs, OMNIBLAST offers advanced possibilities for entertaining the audience with special lighting effects.

OMNIBLAST can be controlled by the DMX-RDM protocol that enables each fixture to be switched on and off individually or synchronised in light shows.
