SMART POLE

Lightability™

a spirit, a mission, our beliefs

Schröder

Experts in lightability™

With a century-long tradition of innovation and entrepreneurial spirit, Schröder pushes the limits of smart lighting. We are broadening our expertise to not only light the urban environment but also provide more services to interact with public spaces and the people in them.

We **help** local authorities establish open, interoperable platforms and provide easy-to-integrate infrastructure that not only improves the quality of life in cities but also the quality of democracy.

We **care** about taxpayers' money and provide the best cost/benefit for citizens. Hence we encourage more effective use of public finances by integrating public policies and operational cost reductions through new technologies.

We **stimulate** active, open and inclusive participation of actors belonging to a city's innovation eco-system, to foster the social, environmental and economic development of businesses and citizens.

We **strive** to create inclusive environments that stimulate accessibility for people with disabilities, encourage gender and ethnic equity, and bring new opportunities to vulnerable places in cities.

We **encourage** and implement training initiatives for citizens, planners and public managers on lighting & smarter cities in an open, transparent and non-biased way.

Your partner in sustainability

Schröder has developed a cohesive, company-wide sustainability strategy called **“Together for our Future”**. This commitment is structured around three axes encompassing the relevant prioritised **UN Sustainable Development Goals** (SDGs).

Sustainability is embedded into our strategy, structure, processes and culture. At Schröder, we collaborate closely with our customers to develop robust and long-term solutions to meet the challenges they face, while adding value with a positive, lasting impact on society and the environment.

PLANET

Being responsible for the planet by reducing our own and our customers' environmental impact.

COMMUNITY

Being responsible for the community by having a resolutely positive impact on society through our solutions.

PEOPLE

Being responsible for our staff members by developing human growth through diversity and respect for human rights.

**SUSTAINABLE
DEVELOPMENT
GOALS**

«Our role as market leader motivates us to take part in the global battle against climate change and contribute to respectful economic development. We help communities face their biggest challenges, making the world more sustainable.»

Werner de Wolf
CEO – Schröder

A company
strongly committed
to sustainability

EcoVadis evaluates more than 85,000 organisations in over 160 countries and in over 200 industries every year. **Based on 21 criteria, the rating assesses a company's performance** in four categories: Environment, Labour and Human Rights, Ethics and Sustainable Procurement.

The EcoVadis gold rating acknowledges the efforts being made every day by every single Schröder employee to enable a better and more sustainable world.

www.ecovadis.com

YOUR PARTNER IN SUSTAINABILITY

Being responsible
for the planet

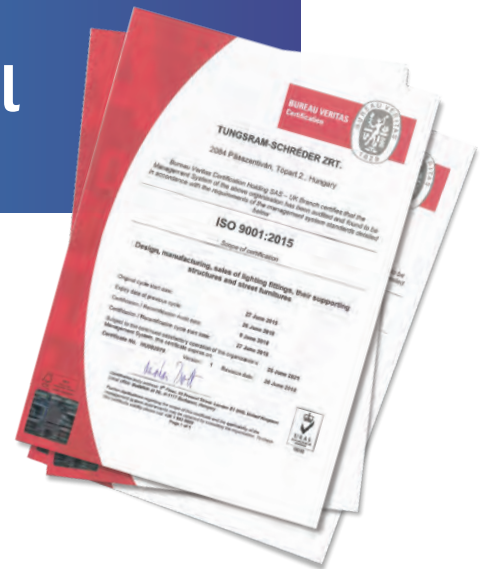

Manufacturing according to the highest environmental standards

All Schröder factories are certified ISO 14001:2015 which recognises their efforts for their environmental management system.

For each factory, a continuous improvement plan for resource efficiency and waste management is put into action by the quality manager.

More information:

www.iso.org

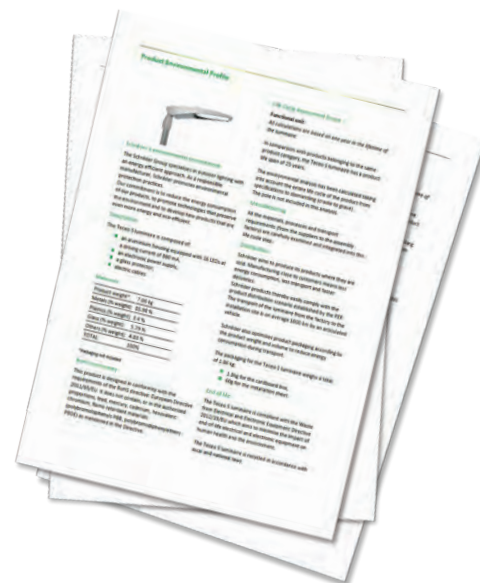

Transparency throughout the complete product life cycle

To provide our customers with clear information on the environmental impact of each luminaire, Schröder relies on **a product life cycle analysis tool** (Instant LCA), developed in collaboration with an independent agency (in accordance with the principles of ISO 14040:2006). The results are available in the **Product Environmental Profile** (PEP) documents.

They summarise the luminaire's life cycle assessment, by examining its environmental impact throughout its life cycle, from raw material extraction to end of life.

The PEP documents are available upon request to all customers to help them demonstrate their regulatory compliance and commitment to minimising their environmental footprint.

Building a circular ecosystem

Schröder takes the circular economy into account, right from the outset. From the concept phase, design guidelines not only consider the production and environmental impact of our luminaires. They also facilitate removing components and increasing the standardisation of parts and the materials' separability once their working life is over.

The **Schröder Circle Light Label** designates products that are optimised for a circular economy without compromising on quality.

We assess our luminaires to evaluate their potential circularity through 12 objective criteria in 5 categories:

- ✓ Performance
- ✓ Maintenance
- ✓ Refurbishment
- ✓ Non-destructive disassembly
- ✓ Recycling

The **Schröder Smart Label** allows installers and infrastructure managers to access essential luminaire information by scanning a QR code. It enables project specific details to be added during installation and facilitates communication between installers and city managers. Troubleshooting assistance and spare parts ordering are also available via the Smart Label, ensuring reliable information on luminaires, anytime, anywhere.

- ✓ Provides instant access to luminaire information via QR code scanning (works online and offline)
- ✓ Provides the ability to add key information during installation
- ✓ Facilitates interaction between installers and city managers
- ✓ Provides support for repairs and parts ordering

The **Schröder Circle Light App** is the practical tool for on-site programming and quick one-for-one driver replacement, to refurbish installed luminaires and extend their life while maintaining the desired operating mode.

It helps lighting operators and installers to:

- ✓ Access all relevant luminaire information by scanning a QR code
- ✓ Program luminaire settings on site and reduce inventory complexity
- ✓ Capture asset installation data
- ✓ View installed luminaires on a map interface
- ✓ Read diagnostic information and operating history on site
- ✓ Extend luminaire life while preserving existing settings

Easily upgrade your existing installations with the **Schröder CIRCLE LED BASE** retrofit kits, sustainable solutions that extend the life of your luminaires. They help you reduce waste, comply with light pollution regulations, minimise maintenance and save energy. With the CIRCLE LED BASE, you can meet the principles of a circular economy without the need for new wiring or changes to your existing lighting infrastructure.

- ✓ **Easy to upgrade:** adapts to existing luminaire frames for LED conversion or replacement.
- ✓ **Easy installation:** plug-and-play design for quick and convenient installation.
- ✓ **Extended infrastructure life:** replace light sources for improved efficiency, preserving existing infrastructure.
- ✓ **Enhanced performance:** superior features including glare control, flicker control, extended life, light pollution reduction and improved safety.

Solutions for maximised energy efficiency

CUSTOM FACTORY DRIVER SETTINGS

Intelligent luminaire drivers can be programmed in the factory with complex dimming profiles. The period between switching on and switching off is used to activate the **preset dimming profile**. The customised dimming system generates maximum energy savings while respecting the required lighting levels and uniformity throughout the night.

SENSORS FOR AUTONOMOUS DYNAMIC SCENARIOS

Photoelectric sensors switch on the luminaires exactly when natural light becomes insufficient (cloudy day, night fall, etc.) so as to provide safety and comfort in the public space.

In places with little nocturnal activity, lighting can be dimmed to a minimum most of the time. By using **motion sensors such as PIR sensors or radars** (taking into account speed and direction criteria), levels can be raised as soon as a pedestrian or a vehicle is detected in the area.

ADVANCED REMOTE CONTROL SYSTEMS

With its user-friendly remote control systems for intelligent lighting, Schröder integrates advanced features for **programming the most efficient dimming profiles based on endless variables** (calendar days, special events, seasons, etc.) while providing safety, comfort and a sense of well-being for people.

Schröder can integrate smart lighting applications such as the ability to adapt the colour of the light or build dynamic lighting scenarios through PIR sensors or radars. As they offer **complete interoperability**, Schröder control systems can manage controllers/sensors and control luminaires from other manufacturers.

Towards environmental excellence of the built environment

We encourage our customers to think strategically about sustainability, co-creating solutions that improve their performance against a wide variety of sustainability criteria. By drawing on our long experience in designing high-performance, low-energy spaces, we can deliver lighting solutions with all the necessary documentation to **help our customers achieve BREEAM certification**.

BREEAM (Building Research Establishment Environmental Assessment Method) is a certification based on the leading sustainability assessment method for buildings, communities and infrastructure projects.

Using Schröder solutions, up to 17 credits (counting for 6 of the 10 criteria considered) can be achieved in the BREEAM assessment.

YOUR PARTNER IN SUSTAINABILITY

Tackling climate change with renewable energy

SOLAR SYSTEMS TO DECARBONISE LIGHTING

With its solar-powered systems, Schröder helps cities and municipalities decarbonise their lighting. The combination of the best technology for harvesting, storing and releasing solar energy with the latest lighting concepts guarantees the best use of renewable energy in the fight against climate change.

SIGNIFICANT SAVINGS COMPARED TO GRID LIGHTING

LED-based solar street lighting solutions are becoming more accessible and cost-effective, driving their adoption in various regions. They provide cities and municipalities with various types of savings.

Energy savings

No electricity bills. Solar systems operate autonomously, using only renewable energy from the sun.

Installation savings

No need for electrical infrastructure. Installation costs are much lower than grid-connected lighting, especially in remote areas or areas with difficult terrain.

Maintenance savings

No reliance on power transmission or distribution infrastructure. There are fewer components to wear out or require maintenance. The solar panels are self-cleaning.

Environmental savings

No heavy infrastructure work to install. No greenhouse gas emissions or other environmental impact during operation.

A SUSTAINABLE SOLUTION FOR MANY APPLICATIONS

Solar lighting has become a credible alternative to grid-powered lighting for a wide range of typical outdoor applications: from roads to bike paths, car parks to campuses, recreational sports facilities to business facilities, solar lighting may be the best solution for your project!

SOLAR-ENABLED SCHRÉDER LUMINAIRES SETTING THE INDUSTRY STANDARD

The IZYLUM, TECEO GEN2 and CITEA NG2 ranges now have specific solar versions as part of the Schröder EKINOX powered by Sunna Design range. With up to 180 lm/W, these optimised solutions make the most of every available watt of solar energy to create safe and comfortable conditions for end users.

Being responsible for the community

The right light where, when and how it is needed

The art of smart lighting consists of putting the kind of light you request where you need it, and taking it away from where you don't require it and when you don't want it. Schröder is your partner for **maximising the advantages of lighting while taking care of the environment** and improving your operational benefit.

With our modern and versatile technologies enabling a **"Dim It, Aim It, Tone It, Change It"** philosophy, we offers our customers complete flexibility to modulate light according to any environmental challenge.

A guarantee of the best photometric solution

As pioneers in lighting technology, our lighting solutions deliver the right light in the right place.

We have developed **numerous photometric engines** over the years to provide **the best solution for every project** in terms of performance, comfort, desired outcome and return on investment. We constantly strive to innovate and develop solutions that are as positive for people as they are sustainable for the environment.

We combine our technical and photometrical know-how to **meet the most demanding lighting standards.**

PureNight: dark sky, bright ideas

PURE

With its PureNight concept based on high-end lighting designs with state-of-the-art photometrical platforms and aiming accessories, Schröder offers the ultimate solution for bringing the night sky back without switching off cities. With Schröder PureNight solutions, you can **direct the light only where it is wanted and needed**.

The right colour temperature at any time

**FLEXI
WHITE**

To choose is to forsake. When it comes to deciding which colour temperature you will opt for, it is never a happy moment. You know that a colder white light optimises performance while a warmer one is more preferable to people and animal natural cycles. What if you didn't have to choose? The Schröder FlexiWhite solution offers you the freedom to use the right colour temperature at any time.

Whether it relies on pre-programmed scenarios, works with the our remote control systems, uses sensors or a mix of all three, the FlexiWhite solution offers you the flexibility to provide **the right level with the right colour temperature at the right place and the right time.**

CASE #1

Preservation of nature, promotion of active mobility

Environment: Bike/pedestrian path
FlexiWhite solution: Amber as default, 3000K upon detection.

AMBER
Nature-friendly, minimal safety lighting

3000K
people detection, maximised safety and comfort (high visibility)

CASE #2

Attractiveness, ambiance and circadian rhythm

Environment: City centre
FlexiWhite solution: 2200K, 3000K and everything in between.

3000K – 30lux
Early evening/early morning
Stimulating atmosphere

2700K – 20lux
Evening/early night
Quieter ambiance

2200K – 5lux
Night
Completely calm mood

Complying with the strictest environmental regulations

Each country, if not each region, has its own environmental regulations. They can be more or less strict and focus on certain specific criteria. All of them are largely inspired by the **EU green public procurement policy** for road lighting, issued in 2019.

Regulation strives to:

- ✓ Limit ULOR to max. 1%;
- ✓ Reduce glare: at least 95% of the light emission is confined to angles below 14.5 degrees from the horizontal;
- ✓ Restrict the emission of blue light with CCT <3000K;
- ✓ Restrain the amount of light to less than 35lm/m²;
- ✓ Prohibit intrusive lighting towards dwellings and any kind of lighting of waterways and the sea.

The PureNight certification software developed by Schröder guarantees that **your lighting solution satisfies environmental laws and requirements**. Schröder has its own certified laboratory and is also endorsed by numerous independent certification bodies.

Preserving the ecosystem

Fauna and flora can suffer from high light intensity, the colour spectrum (blue light) and excessive lighting over time. **Only experts can minimise the disturbance to the different species of fish, insects and endangered animals.**

Trees and hedgerows are natural environments for bats, while rivers and canals are also important for foraging. Certain species of bat are very sensitive to light.

Light pollution, i.e. excessive lighting and uncontrolled light spill, contributes significantly to insect mortality.

The **Schröder PureNight photometry meets dark-sky specifications** (0% ULOR and 2200K) and take advantage of accessories (backlight control and glare limiter) to focus the light only where it is needed.

Schröder's FlexiWhite solution combines dimming and colour temperature changes according to fixed or on-demand scenarios with sensors for **safe and environmentally-friendly lighting**.

The IP66 design of our luminaires prevent insects from entering and being captured in the housing. With low driving current, the outer surface of the housing maintains a low temperature, preventing insects from dying from the heat.

With the right luminaire design, photometry, colour temperature and dimming scenario, Schröder protects wildlife and contributes to the preservation of the ecosystem.

YOUR PARTNER IN SUSTAINABILITY

Being responsible with people

Valuing difference, being inclusive, and embracing diversity

At Schröder, every employee is valued for her or his skill set. We actively look for and choose employees based on their experience and the value they bring to the company. This concept is underlined in our **Code of Conduct**.

The diversity of the staff, in all its forms (skills, experience, age, gender, culture, etc.), is **a source of renewal, innovation and creativity**. In line with the UN's goals, we decided to focus our efforts primarily on gender diversity and equality, as this is still an on-going concern in society as a whole.

Protecting human rights

Schröder has adopted the Responsible Business Alliance (RBA) Code of Conduct as its standard on human rights. Our goal is to **protect human rights directly and indirectly** by ensuring that Schröder's entities and their supply chain are safe and that workers are treated with respect and dignity.

We require all our suppliers to confirm adherence and compliance with the RBA standard.

More info: www.responsiblebusiness.org

Training and education

Schröder has developed its own internal training academy called SKILL, which stands for Sharing Knowledge in Light and Lighting. SKILL's mission is to **increase Schröder employees' and stakeholders' competencies to successfully face changes** in the lighting market such as smart lighting and new control systems. SKILL also develops e-learning and online courses, both for Schröder employees and customers.

LARGE AREA & FLOOD

“ Solutions for safe and comfortable environments with maximised operational benefits ”

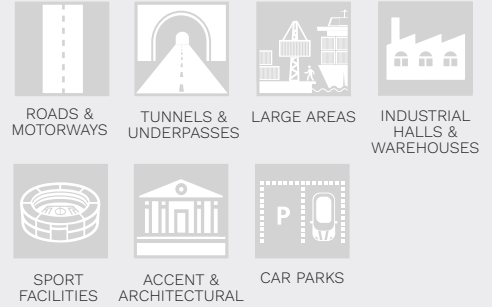

Schröder

OMNISTAR

MAIN APPLICATIONS

Designed to bring massive savings and benefits to area lighting

OMNISTAR provides a beneficial lighting solution in a variety of indoor and outdoor applications such as tunnels, docks, industrial buildings, sport facilities, large car parks and airports.

This platform has been designed to provide an unrivalled combination of performance and flexibility for lighting areas where high lumen packages are needed with the added advantages of a LED solution: low energy consumption, improved visibility with white light, limited maintenance and longer life.

OMNISTAR can be installed in various configurations (suspended, surface-mounted or post-top) with one to three optical units. OMNISTAR can operate with a large range of outdoor and tunnel control solutions (daylight sensors, dimming, remote management, ATS 4) and a building management system with the DALI protocol to further maximise energy savings by adapting the lighting levels according to the real needs of the place to be lit.

OMNISTAR	1 optical unit
Recommended installation height	8 to 45m / 26' to 148'
Typical luminaire output flux (range)	7,800 to 80,800lm
Power consumption	75W to 594W
Colour temperature	Warm white (730 and 830), neutral white (740 and 940) or cool white (757 and 957)
Nominal voltage	220-240V / 120-277V / 347-480V 50-60Hz
Surge protection	10kV

KEY ADVANTAGES

- > Real beneficial LED alternative to HID floodlights for high-power applications
- > Flexibility: modular approach with wide range of lighting distributions
- > Highly efficient light distributions reduce the quantity of luminaires to be installed
- > Various mounting options and inclination possibilities on-site for optimal photometry
- > Explosion-proof variant for use in industrial environments with a hazardous atmosphere
- > Various control options including remote management systems

OMNISTAR is available with various suspended mounting systems (fixed, tiltable or suspension with chains) for indoor areas and tunnels.

DESIGN HIGHLIGHTS

The standard bracket enables the luminaire to be angled on-site.

The OMNIBOX is an IP 66 universal remote gear box made of die-cast aluminium for up to 4 optical units.

With up to 240 high-power LEDs, OMNISTAR delivers high lumen packages.

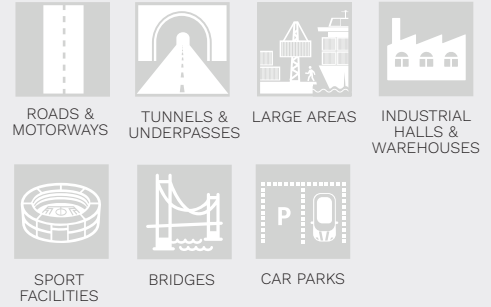

OMNISTAR is delivered with quick connectors for easy installation.

OMNISTAR KIT

MAIN APPLICATIONS

Complete,
powerful
lighting
solution,
dedicated to
industrial and
large area
applications

OMNISTAR KIT is a combination of the powerful OMNISTAR optical unit and the innovative gear box – the OMNIBOX. Available in three versions, these luminaires offer a modular and powerful LED lighting solution for applications such as warehouses, high bays, tunnels, sports arenas, airports, car parks and large areas.

OMNISTAR KIT luminaires have been designed to provide unrivalled photometric performance for lighting areas where high lumen packages are needed, while benefiting from all the advantages of an economical LED solution: reduced energy consumption, limited maintenance and fast return on investment.

OMNISTAR KIT	STD	PRO	ECO
Recommended installation height	8 to 45m / 26' to 148'		
Typical luminaire output flux (range)	5,600 to 81,000lm	5,600 to 80,800lm	20,200 to 72,200lm
Power consumption	73W to 594W	73W to 594W	302W to 619W
Colour temperature	Warm white (730 and 830), neutral white (740 and 940) and cool white (957)		
Nominal voltage	120-277V / 220-240V / 347-480V / 50-60Hz		
Surge protection	10kV, 20kV		

KEY ADVANTAGES

- > Real beneficial LED alternative to HID floodlights for high-power applications
- > Cost-effective and efficient to maximise energy and maintenance savings
- > Highly efficient light distributions reduce the quantity of luminaires to be installed
- > Various mounting options and inclination possibilities on-site for optimal photometry

NEOS LED

Design: Michel Tortel

MAIN APPLICATIONS

LARGE AREAS

RAILWAY STATIONS & METROS

BIKE & PEDESTRIAN PATHS

URBAN & RESIDENTIAL STREETS

SQUARES & PEDESTRIAN AREAS

BRIDGES

CAR PARKS

ROADS & MOTORWAYS

**Robust,
versatile
luminaire for
all road
and urban
applications**

Compact yet powerful, light yet robust, the NEOS LED range provides multiple configurations to create comfort and security in numerous road and urban environments.

Available in three sizes and with multiple light distributions, the NEOS LED provides a high-performing and energy-efficient lighting solution for pedestrian areas, streets, roads, car parks and bike paths.

These versatile multi-purpose luminaires are designed to ensure that the lighting meets the real needs of the place to be lit.

NEOS LED	1	2	3
Recommended installation height	4 to 8m / 13' to 26'		
Typical luminaire output flux (range)	1,000 to 5,800lm	2,000 to 10,600lm	3,900 to 14,700lm
Power consumption	11W to 44.5W	20.5W to 80W	38W to 116W
Colour temperature	Warm white (727, 730 and 830) or neutral white (740)		
Nominal voltage	220-240V / 50-60Hz		
Surge protection	10kV		

KEY ADVANTAGES

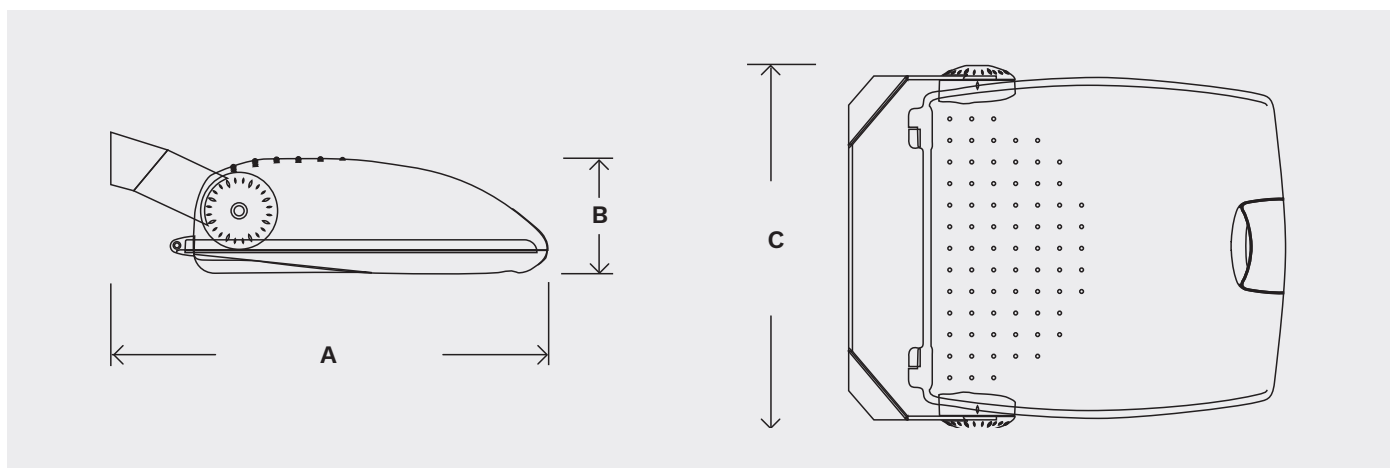

- > LensoFlex®2 photometric engine with photometry adapted to various applications
- > Adjustable inclination on-site
- > FutureProof: easy replacement of the photometric engine and electronic assembly on-site
- > Dedicated range of brackets and poles

ASTRAL SLIM

MAIN APPLICATIONS

RAILWAY
STATIONS &
METROS

CAR PARKS

INDUSTRIAL
HALLS &
WAREHOUSES

SPORT
AREAS

Creating
safety
and ambiance
in enclosed
areas

Combining design, efficiency and modularity, ASTRAL SLIM is a great alternative to fluorescent tubes for continuous or discontinuous lighting in enclosed areas such as train and metro stations, airports, shopping centres or any other indoor applications where the safety and well-being of the users are critical.

Thanks to its sleek and elegant housing, ASTRAL SLIM contributes to the creation of a visually appealing environment with uniform, low-glare lighting that gives a real sense of safety and offers superior visual comfort.

Designed to provide operational benefits for site managers, this state-of-the-art LED linear lighting solution is characterised by its high efficiency, reduced energy consumption, minimal maintenance requirements and easy installation.

ASTRAL SLIM

Recommended installation height	3 to 8m / 10' to 26'
Typical luminaire output flux (range)	1,500 to 4,000lm

Schröder

Make life easy with the Schröder ITERRA control system

The must-have lighting control solution for sports facilities

▶ LET'S GET EASY. LET'S GET WIRELESS.

No extra cabling, no PLC, no complicated commissioning process. Schröder ITERRA is the **100% wireless control system for indoor and outdoor** sports facilities. Based on a Bluetooth™ mesh network, it offers a real **plug-and-play solution** able to control all luminaires and floodlights using standard DALI, DALI-2 or 0-10V/1-10V protocols.

▶ ONE TOUCH, GREAT EXPERIENCE.

A mobile app-based system, Schröder ITERRA is very **easy to operate** with a tablet or smartphone. It comes with an **intuitive visual interface** that users can quickly personalise to the layout and settings of their lighting installation. Through differentiated user rights, managers can decide on access to system features and lighting scenarios according to the profile of the individual.

With Schröder ITERRA, it is easy to provide the right light (light distribution, intensity, colour temperature and theatrical effects) at any time to energise athletes and spectators while ensuring **safety, accuracy and visual comfort**.

▶ SERIOUSLY SMART

Although the Schröder ITERRA control solution is extremely user-friendly, it is based on state-of-the-art, efficient technologies to offer maximum flexibility and savings for a quick return on investment. As an **ecosystem based on leading industry standards**, it ensures compatibility with future developments and extensions. Firmware updates are automatically supported by the application. Schröder ITERRA is **a must-have** for sports facility managers who want to maximise the benefits with the utmost peace of mind.

Minimum hardware, maximum flexibility

The Schröder ITERRA control solution is characterised by a minimal footprint and excellent flexibility for on-site installation.

ITERRA DYNAMIC SWITCH

Transforming any basic switch into a smart command, programmable with the Schröder ITERRA application

ITERRA MODULE NODE

Indoor module converting a wired DALI/0-10V signal into BLE wireless communication

ITERRA GATEWAY

Control your complete Schröder ITERRA lighting system via the cloud with an internet connection

ITERRA XPRESS

Physical remote control configurable with the Schröder ITERRA application

ITERRA ZHAGA NODE

Plug-and-play node for mounting on a standard Zhaga Book 18 socket

ITERRA BASICBOX

Cabinet centralising DALI wired connections and equipped with a NEMA 7-pin socket

ITERRA NEMA NODE

Plug-and-play node for mounting on standard NEMA 7-pin sockets (BASICBOX or luminaire)

SCHRÉDER ITERRA APP TO MANAGE YOUR COMPLETE INSTALLATION

An intuitive and easy-to-use application on any mobile device (smartphone or tablet, Android or iOS) allows you to control your entire lighting installation and manage multiple areas, from indoor to outdoor lighting.

Perform.
Play.
Win.

- Quick and easy implementation
- Open technologies and standards
- Outstanding user experience
- Futureproof solution
- Cost-effective control system
- Additional energy savings & increased lifetime of luminaires
- Remote and physical control, data monitoring and preventive maintenance
- Management of user rights for a variety of user profiles

ECOBLAST

MAIN APPLICATIONS

SPORTS
AREAS

LARGE
AREAS

Smart
modular
solution for
sports lighting

ECOBLAST is a range of high-performance floodlights designed to provide the right light in indoor and outdoor sports venues as well as other large areas where high lumen packages and razor-sharp lighting distributions are needed.

This modular solution offers beneficial alternatives to floodlights equipped with 1000W, 1500W or 2000W discharge lamps. Thanks to its versatile mounting system, ECOBLAST is fully compatible with existing infrastructure for retrofit projects. The modular approach optimises the weight and lowers aerodynamic resistance to minimise the mechanical stress on the supporting structure.

Equipped with the latest generation of photometrical engines, ECOBLAST stands out with cutting-edge distributions to offer perfect uniformity and superior visual comfort for players, spectators and neighbours (low glare and minimised light spill). ECOBLAST is the ideal tool to comply with sports federations and international regulations. With its DALI2 and DMX-RDM options, ECOBLAST is fully compatible with the ITERRA remote control system.

ECOBLAST	3	4	5	6
Recommended installation height	8 to 50m / 26' to 164'			
Typical luminaire output flux (range)	56,900 to 112,700lm	75,900 to 150,300lm	94,900 to 187,900lm	114,000 to 225,500lm
Power consumption	680W to 910W	900W to 1,210W	1,130W to 1,520W	1,350W to 1,820W
Colour temperature	Warm white (730), neutral white (740 and 840) or cool white (757, 857 and 957)			
Nominal voltage	220-240V / 277V / 347V / 400V 50-60Hz			
Surge protection	10kV			

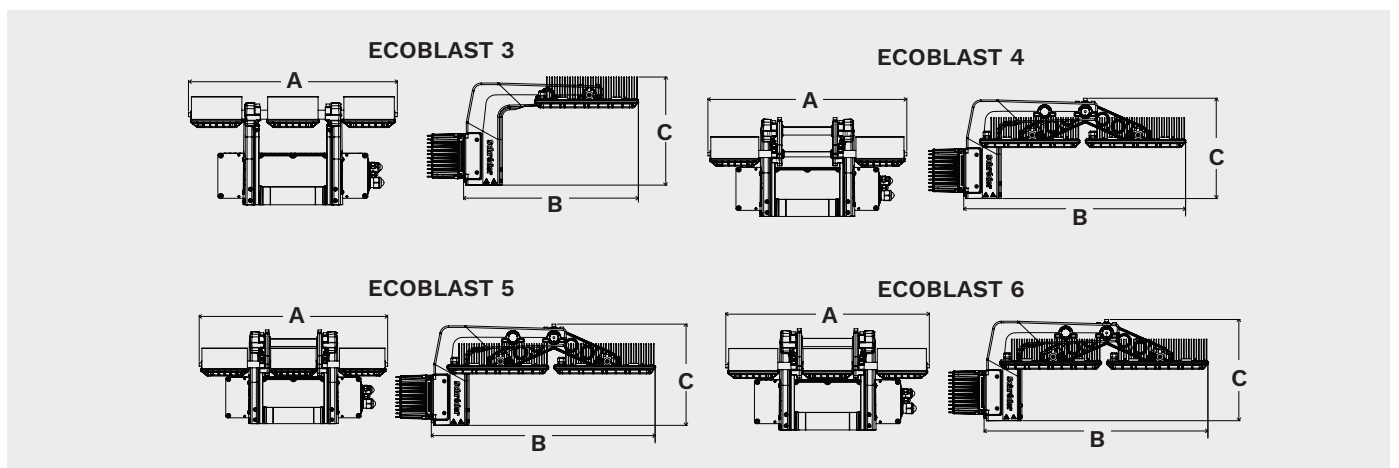

KEY ADVANTAGES

- > Fully compatible with existing infrastructure (mounting and cabling) in retrofit projects
- > Flexibility: modular approach for high-power applications
- > Versatile mounting: remote gear box or fixed to the floodlight
- > Compliant with international sports federation regulations
- > Optimised glare control
- > Inclination angle adjustable on-site for each row of modules and/or the complete bracket
- > Instant on/off and entertainment mode to create dramatic/theatrical effects

KG with glass protector	20.5kg 44.1lbs	29.1kg 63.9lbs	33.1kg 72.8lbs	36.9kg 79.4lbs

DESIGN HIGHLIGHTS

ECOBLAST is a modular solution with up to 6 modules, including tilt settings on the whole ensemble and per row of modules.

The ECOBLAST bracket offers two positions for the structure supporting the modules: front or rear.

The universal mounting part on the ECOBLAST bracket is designed to comply with existing infrastructure for retrofit projects.

ECOBLAST offers maximum flexibility with a gear box that can be mounted on the bracket or remotely at a distance of up to 200m.

To maintain performance over time, ECOBLAST has been designed to optimise heat dissipation.

The ECOBLAST modules are available with a polycarbonate or glass protector.

Versatile
and efficient
lighting
solution for
outdoor sports
facilities

The BRITELINE GEN2 floodlight offers a versatile and effective solution for lighting outdoor sport facilities and large areas where energy efficiency is a must.

With its innovative design comprising adjustable and corrosion-resistant modules, this floodlight offers unparalleled versatility and precise configuration to accommodate any existing setup while ensuring accurate photometry.

Equipped with high-performance LED engines, BRITELINE GEN2 stands out by delivering exceptional performance at affordable costs. Its light distributions and backlighting options not only provide outstanding visibility but also adhere to strict environmental standards, meeting light pollution regulations and dark sky requirements.

Compatible with the Schröder ITERRA control system, BRITELINE GEN2 provides intelligent and intuitive lighting, elevating recreative sports and outdoor floodlighting to unprecedented levels.

OMNIBLAST

MAIN APPLICATIONS

SPORTS AREAS

LARGE AREAS

ACCENT & ARCHITECTURAL

Unrivalled
combination
of
performance
and flexibility

OMNIBLAST is the ideal tool for sports venues and other very large area applications that require a lighting solution with the highest efficiency and flexibility to adapt to the different lighting needs.

OMNIBLAST ensures high horizontal and vertical lighting levels to meet the strict requirements of sports federations and TV broadcasting.

A modular concept of optical units means that 1, 2 or 3 modules can be mounted on the same bracket to offer the utmost versatility, providing light distributions and lumen packages perfectly adapted to the specifications of the area to be lit.

To enhance the on-site experience and television images, OMNIBLAST guarantees perfect glare control, a high CRI and television lighting consistency index (TLCI) as well as flicker-free lighting. OMNIBLAST benefits from various dimming options and ensures theatrical effects.

OMNIBLAST	1	2	3
Recommended installation height	8 to 50m / 26' to 164'		
Typical luminaire output flux (range)	18,600 to 64,800lm	34,500 to 129,700lm	54,900 to 194,600lm
Power consumption	244W to 618W	488W to 1,160W	1740W
Colour temperature	Warm white (830), neutral white (740 and 940), cool white (757 and 957), NCW+Amber or RGB CW		Warm white (830), neutral white (740 and 940) or cool white (757 and 957)
Nominal voltage	120-277V / 220-240V / 347-480V / 50-60Hz		
Surge protection	10 / 20kV		

KEY ADVANTAGES

- > Cost-effective and efficient to maximise energy and maintenance savings
- > Flexibility: modular approach for high-power applications
- > Compliant with international sports federation regulations
- > High Colour Rendering Index (CRI) and Television Colour Consistency (TLCI)
- > Compliant with UHD/ HD/4K broadcast and super slow-motion replays (flicker-free)
- > Instant on/off and entertainment mode to create dramatic/theatrical effects
- > Optimised glare control

LARGE AREA & FLOOD

DESIGN HIGHLIGHTS

OMNIBLAST takes advantage of patented cooling technology for sustainable performance.

Each module can be tilted individually up to 40° (+20°/-20°).

The lightweight yet robust bracket for 2 or 3 modules incorporates various settings.

OMNIBLAST offers a wide range of accessories (brackets, louvers, hoods, etc.)

With its tunable white or RGB LEDs, OMNIBLAST offers advanced possibilities for entertaining the audience with special lighting effects.

OMNIBLAST can be controlled by the DMX-RDM protocol that enables each fixture to be switched on and off individually or synchronised in light shows.

INDU BAY GEN3

CAR PARKS

Setting the
benchmark
in high-bay
lighting

With the 3rd generation INDU BAY, Schröder offers the leading luminaire for lighting industrial facilities with a minimised total cost of ownership.

More efficient, light, versatile, designed for the requirements of specific industries (metal, automotive, food and beverage, etc.) and smart, it delivers the best solution on the market today for high-bay applications.

It outperforms all other fixtures thanks to the substantial energy savings it generates and the performance it delivers over time.

Available with various lumen packages, light distributions and mounting options, INDU BAY adapts the lighting to meet the specific needs of your environment.

It not only lowers your investment. It maximises it by providing a comfortable environment for your staff while limiting energy consumption to what is absolutely necessary.

INDU BAY GEN3	1	1 HT	2 HT	2
Recommended installation height	4 to 12m / 13' to 39'			
Typical luminaire output flux (range)	15,500 to 21,100lm	9,800 to 10,700lm	22,600 to 24,900lm	25,800 to 32,100lm
Power consumption	115W to 140W	70W	150W	185W to 210W
Colour temperature	Neutral white 840 or cool white 857			
Nominal voltage	220-240V / 50-60hz			
Surge protection	2 / 4 / 6kV			

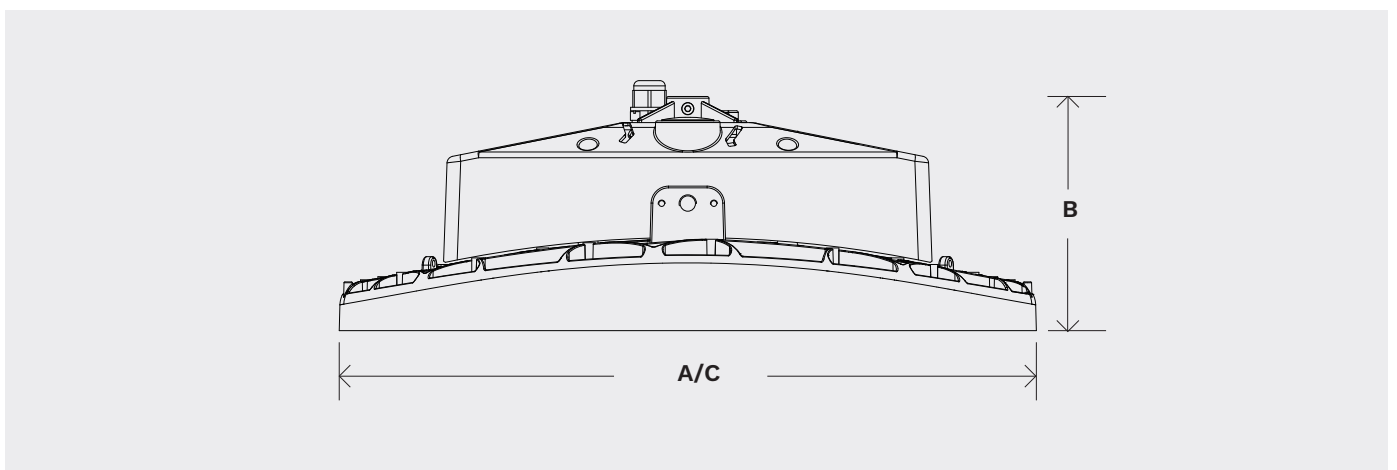

KEY ADVANTAGES

- > One-to-one replacement for HID fixtures from 40W to 400W
- > Light-on-demand feature with optional motion sensor
- > Emergency lighting with optional battery
- > High visual comfort
- > Compact housing optimised for heat dissipation and reduced dust accumulation
- > Dedicated range of mounting accessories
- > INDU BAY HT variant providing a dedicated solution for extremely hot environments
- > Compatible with Schröder's indoor and outdoor control system

DIMENSIONS | MOUNTING

INDU BAY is delivered with a hook for a suspension chain (not included). A fork mounting system enables the luminaire to be inclined on-site for precise adjustment.

DESIGN HIGHLIGHTS

INDU BAY is equipped with a graduated U-bracket for precise on-site setting.

In case of an emergency, an optional auxiliary battery can power the INDU BAY for 3 hours to provide safety lighting.

INDU BAY HT offers a dedicated solution for extremely hot environments.

INDU BAY can be equipped with a motion sensor for light-on-demand scenarios.

Efficiency and versatility for indoor and outdoor area lighting

With multiple combinations of lumen packages and light distributions, **INDU FLOOD** is the ideal tool to provide an efficient multi-purpose lighting solution for industrial environments.

Available in 3 sizes, this compact luminaire perfectly integrates environments to provide the exact lighting requirements for the space to be lit. Delivered with a mounting bracket and also available with a post-top fixation, it can be adjusted on-site for precise optical control. It is perfect for replacing fixtures with discharge lamps from 50 to 800W.

INDU FLOOD provides a bright white light for excellent visibility and colour perception, delivering value beyond energy savings.

Its robust design, with a high IP rating, guarantees performance for many years to come, even in the harshest conditions.

Ø76mm

Fork enabling the inclination to be adjusted. Optional post-top mounting.

DESIGN HIGHLIGHTS

The universal U-bracket includes a graduation system for precise on-site setting.

INDU FLOOD provides easy access to the gear compartment.

The floodlight includes two cable glands at the back (in and out) for a daisy chain layout. It is designed for integration with building management systems (DALI 2.0 or 1-10V protocol).

As an option, INDU FLOOD can be equipped with a sensor (motion and daylight) for light-on-demand scenarios.

The post-top mounting enables easy adjustment of the tilt angle of the luminaire on site.

INDU FLOOD GEN2 offers post-top mounting with an optional adapter.

It's time to
SHUFFLE
your world!

SMART & CONNECTED

SHUFFLE

Decluttering
cities on their
journey to
becoming smart

The SHUFFLE smart column is a connected, modular approach to city hardware. With plug-and-play rotatable modules that contain pre-certified hardware, it can be configured to suit your specific needs.

Redesign. Reorganise. Improve. Combine. Do these all at once with SHUFFLE, an integrated concept with unlimited opportunities to **bring the experience to a new level** in cities and venues. Information, identity, safety, communication, entertainment, mobility and much more. All your various features can be gathered elegantly into **one integrated platform**. Not set in stone, but with versatility and ready for future evolutions. You can create your personalised SHUFFLE by associating **up to 5 modules per column**, or pick one of our preconfigured variants.

KEY ADVANTAGES

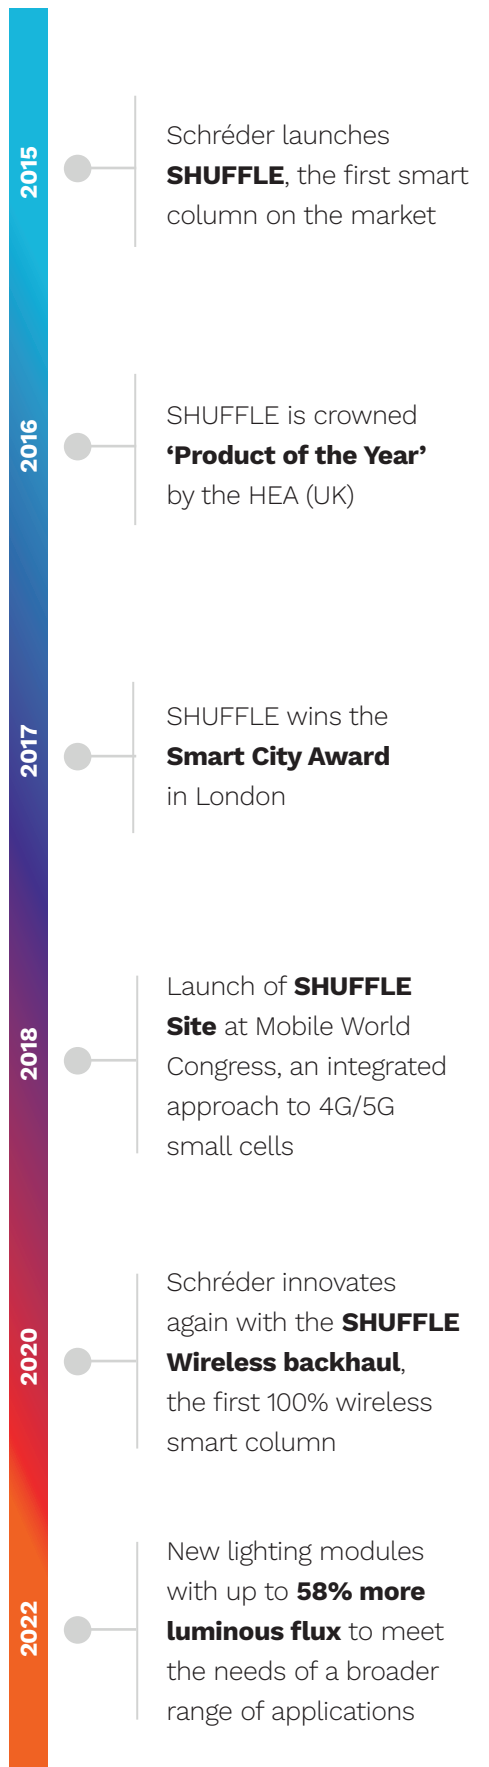

- Seamless integration of urban hardware in a refined column
- Personalised combinations: up to 5 modules per column
- Preconfigured versions: Campus, SOS, Security, Light and Mobility
- Total versatility with 360° rotatable modules
- Patented system for easy installation
- Upgradable: modules can be added or replaced after installation
- Fully connected platform

Leading with **non-stop innovation**

SHUFFLE was launched in 2015, and many enthusiastic customers who set out to shed extra light on their vibrant urban living spaces have installed it. And they went **beyond simple outdoor lighting**. They took the opportunity offered by this platform to bring new services into their environments, such as WiFi, surveillance cameras, loudspeakers, emergency buttons and EV chargers. Just a year after its launch, SHUFFLE was awarded **'Product of the Year 2016'** by the Highway Electrical Association (HEA) in the UK. A little while later, in 2017, SHUFFLE received the **'Smart City Award'** in London for its technology with great potential for smart cities. In 2020, Schröder made SHUFFLE independent from physical wiring for lightning-speed connectivity, creating the first wireless smart column. This spirit of constant innovation combined with exquisite design, attention to detail and a deep understanding of customer needs has positioned SHUFFLE as a benchmark in the market. Since their launch, SHUFFLE columns have delighted cities and private companies in **more than 35 countries** worldwide.

SHUFFLE SOS

THE CITIZENS' GUARDIAN ANGEL

SHUFFLE SOS offers the perfect solution for helping people and emergency services in critical situations. With one simple push of a button, citizens can quickly get in touch with the emergency services if they witness an incident or are the victim of an accident.

Using a voice-over IP intercom, people can explain the problem and **receive proper assistance**. The embedded cameras enable call centres to take the right actions thanks to a real-time video feed. The strobe light and horn, which can be triggered remotely, make sure that the emergency signal is seen and heard by bystanders in the area. They also **guide the emergency crew** to the exact location of the incident.

With SHUFFLE SOS, people never feel alone in a city. They receive the support they expect in the shortest possible time. Emergency services are able to react accordingly and cover a larger area, optimising their resources.

SHUFFLE CAMPUS

CREATING PLACES PEOPLE LOVE TO BE IN

SHUFFLE Campus is the right tool for ambitious companies, institutions, public services and cities wanting to offer a high-quality experience to their workers, customers, residents, citizens or visitors.

It is designed to provide multiple services, aesthetically and efficiently, to **business facilities, condominiums, academic, medical or sport complexes, parks, shopping malls or transport infrastructures** such as airports and train or bus stations. SHUFFLE Campus creates **safe, pleasant places, connecting people** to the internet, informing and entertaining them, while keeping an elegant and discreet presence that blends into any environment. SHUFFLE Campus is **a great asset for placemaking** as it strengthens the connection between people and the urban environment with a minimal footprint.

SHUFFLE SECURITY

BUILDING CONFIDENCE IN OUTDOOR AREAS

Feeling secure is a basic human right. Your residents and visitors want to feel safe at all times. SHUFFLE Security delivers a strategic breakthrough to address this challenge with advanced lighting and security features.

It is designed to **create safe and pleasant outdoor areas:** tourist sites, parks and squares, outdoor spaces around public and private buildings (embassies, ministry buildings, banks, hospitals, schools, etc.), metro, bus or train stations, car parks and sports or leisure venues. SHUFFLE Security provides a monitoring system that enables bidirectional communication: from authorities to citizens or security companies to people in the environment, and vice versa, from end users to public/property managers.

SHUFFLE Security improves confidence in using outdoor environments. It encourages people to socialise, to contribute to the local economy and to develop a true sense of community.

- Integrated fuse
- Integrated cable retainer
- Passage to the outside for cables

	Power sockets (SHPOLE2-G8)	Event lighting socket (SHPOLE2-FU)
Location	At the bottom of the pole	At the top of the pole
Number of sockets	2	1
Type	Schuko Type F 16A 230V	Schuko Type F 16A 230V
Purpose	Power sockets for any need	Power socket for decorative lighting
Max. power	3500W	1200W

EV CHARGING 

EV charger
(SHPOEV2)

Professional charging station

- AC charging 11kW
- European socket (type 2)
- Safety locking during charging
- Access unit (for cabinet mounting)

LIGHTING

360° LensoFlex®2/
LensoFlex®4 (SH36L2)

Street lighting / Ambiance lighting / Pedestrian crossing lighting

- Lumen package range: from 1,500 to 8,100lm
- Back light control (optional)
- Warm or neutral white LEDs
- Optional internal diffuser or external diffuse protector for enhanced visual comfort

180° Spot (SH18L)

Up/down (on-site adjustment): architectural lighting

- Lumen package range: from 1,300 to 2,400lm
- On-site inclination angle settings: -10/+40°
- Warm or neutral white LEDs

180° LensoFlex®2 (SH18L)

Street lighting

- Lumen package range: from 2,200 to 5,500lm
- Back-light control (optional)
- Warm or neutral white LEDs

180° reflector (SH18L)

Down: Street lighting / Ambiance lighting / Area lighting Up: Architectural lighting

- Lumen package range: from 2,300 to 6,000lm
- Neutral or warm white LEDs

Light ring (SHLR2)

Signage / beautification (identity) / creation of ambiance

- Static red, blue, green, warm or neutral white variants
- 1 or 2 alternating static colours
- RGB for colour changing effects

Luminaire bracket (SHLB)

Street lighting / Pedestrian crossing lighting

- For luminaire with mounting for Ø60mm/2.3"
- Inclination angle: +5°

With PIANO Midi

With FLEXIA FG Midi

With YMERA

With CITEA NG Mini

CCTV - 180° **For professional camera networks**

- Resolution: full HD (1920 x 1080)
- Image optimisation (back-light, contrasts, night vision, high luminosity)
- Privacy layers
- ONVIF communication standard
- Event triggering: motion detection, video analytics, tampering, etc.
- Digital zoom
- Data optimisation: selected and/or delayed transmission, on-site recording (SD memory slot)
- Compatible with video management systems

IR	15m	No	30m
Power consumption	3W	6.4W	7.5W

CCTV - 360° 

QuadView
(SHCQV)

**Integrated 360-degree video
CCTV solution**

- Offers a 360° field of view
- Contains 4 separate sensors with wide 113° horizontal field of view per sensor
- Vertical angle of view: 62°
- Streams videos from four sensor units simultaneously
- Supports 1920x1200/1080 (1080p) resolution with up to 50/60fps (50/60Hz)
- Supports Wide Dynamic Range (WDR) – Forensic Capture
- Ideal for very bright and/or dark areas
- Support for Zipstream technology lowers bandwidth and storage use
- Withstands dust, rain, snow, vibrations, shocks and impacts
- IP connectivity through standard Ethernet ports
- Power over Ethernet or 8–28V DC
- Features two SD card slots for optional local storage

Universal camera
bracket (SHCBR)

Integrated hanging bracket for PTZ cameras

- Compatible with most PTZ cameras on the market
- Excellent stability for minimal camera movement
- Concealed cable management

INTERCOM SOS

One-touch system to contact operators and/or to trigger panic response scenarios

- Vandal-resistant SIP and IP intercom
- Optional HD video at up to 30FPS (1440x1080px) and H.264 for integration with most video solutions
- Crystal clear audio
- Active background noise cancellation
- Automatic volume adjustment
- Stainless steel front plate with one button
- Can interact with SHUFFLE Strobe, light ring, horn and cameras

	Intercom (SHPOIC2-GH)	Intercom with camera (SHPOIC2-GI)
Internal speaker amplifier	10W class D	10W class D
Microphone	Digital MEMS, omnidirectional	Digital MEMS, omnidirectional
Power supply	PoE or external power supply	PoE or external power supply
Camera	-	Fixed lens, 1440x1080 pixels
Power consumption	Idle 1.8W Max 12W	Idle 3.5W Max 12W

STROBE SOS

360° Lighting with strobe (SH36L2-HL/SH36L2-HM)

Vital visual aid for emergencies

- Lumen package range: from 1,500 to 8,100lm
- Flashing blue strobe light
- Can be triggered remotely or locally via the intercom button

HORN SOS

Horn (SH18S2-HN/SH18S2-HO)

Warning or alarm with a powerful electronic tone

- Warning or alert to the nearby population
- Supports voice-over IP
- Multi-tone up to 105dB
- Can be triggered remotely
- Can be integrated into a global warning system
- Can be linked to SHUFFLE Intercom
