RECYCLING BINS

COMPANY PROFILE

CERVIC ENVIRONMENT is part of the family-owned company CERVIC, S.A.® with **50 years of history**. The national leader in Spain with presence in more than **37 countries worldwide**.

Specializing in **recycling bins and street furniture**, Cervic Environment offer solutions characterized by their **excellent functionality and reliability, combined with aesthetics** that decorate and fit perfectly in the environment. Our products have successfully passed **functional and resistance tests under real conditions of use to guarantee their reliability and performance**.

Certified by AENOR under the standard UNE 166.002 concerning innovation and development management, our department of engineering and design have received several awards from national and international organizations.

The hallmark and the strength of Cervic Environment is, without a doubt, our capacity and flexibility to **develop custom products by adapting our own products or creating an entirely bespoke design to suit the customer's particular needs**.

Each of our steps is aligned with the commitment to a **sustainable business project**, which supports a **circular economy business model**, and is characterized by using resources in a sustainable way and **Ecodesign**: developing environmentally friendly products that incorporate **recycled materials**, with a **very significant durability**, and **100% recyclable** at the end of its useful life.

From our manufacturing facilities in Spain, we design, produce and supply our products around the world.

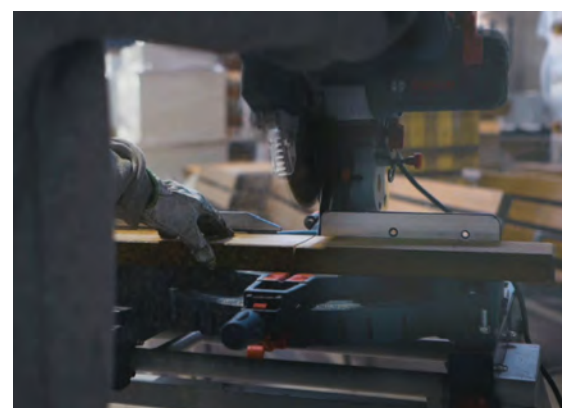

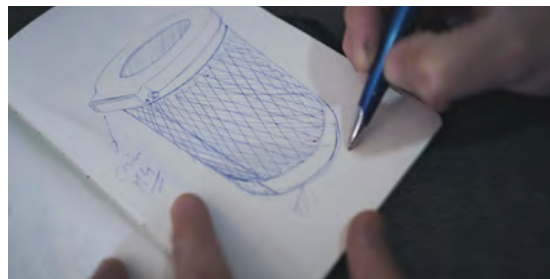

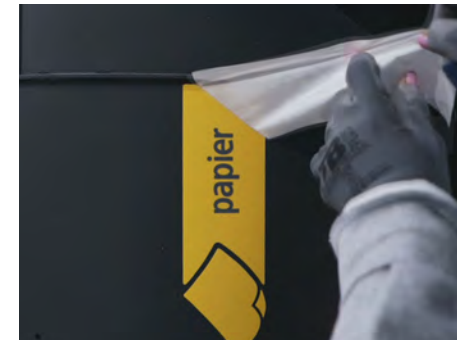

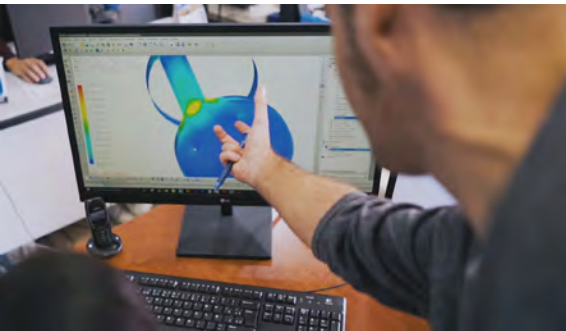

R&D Management System
certified by AENOR

LOOKS SMART, WORKS BETTER

- At Cervic Environment, “design is more than the look of a product, design is above all how the product works”.
- Our quality designs, with great functionality and reability lead us to have very loyal customers.

CERTIFIED SELF-EXTINGUISHING BINS

Cervic environment has one of the most extensive range of Self-Extinguishing bins.

Cervic Self-extinguishing bins, due to their specific configuration & design, keep the fire inside the bin (avoiding the fire to come out and spread). Additionally the Self-extinguishing bins turn off the flames in the inside by themselves, extinguishing the fire this way.

Specially suitable for public buildings and facilities such as airports, subway stations, train stations, schools, universities, etc.

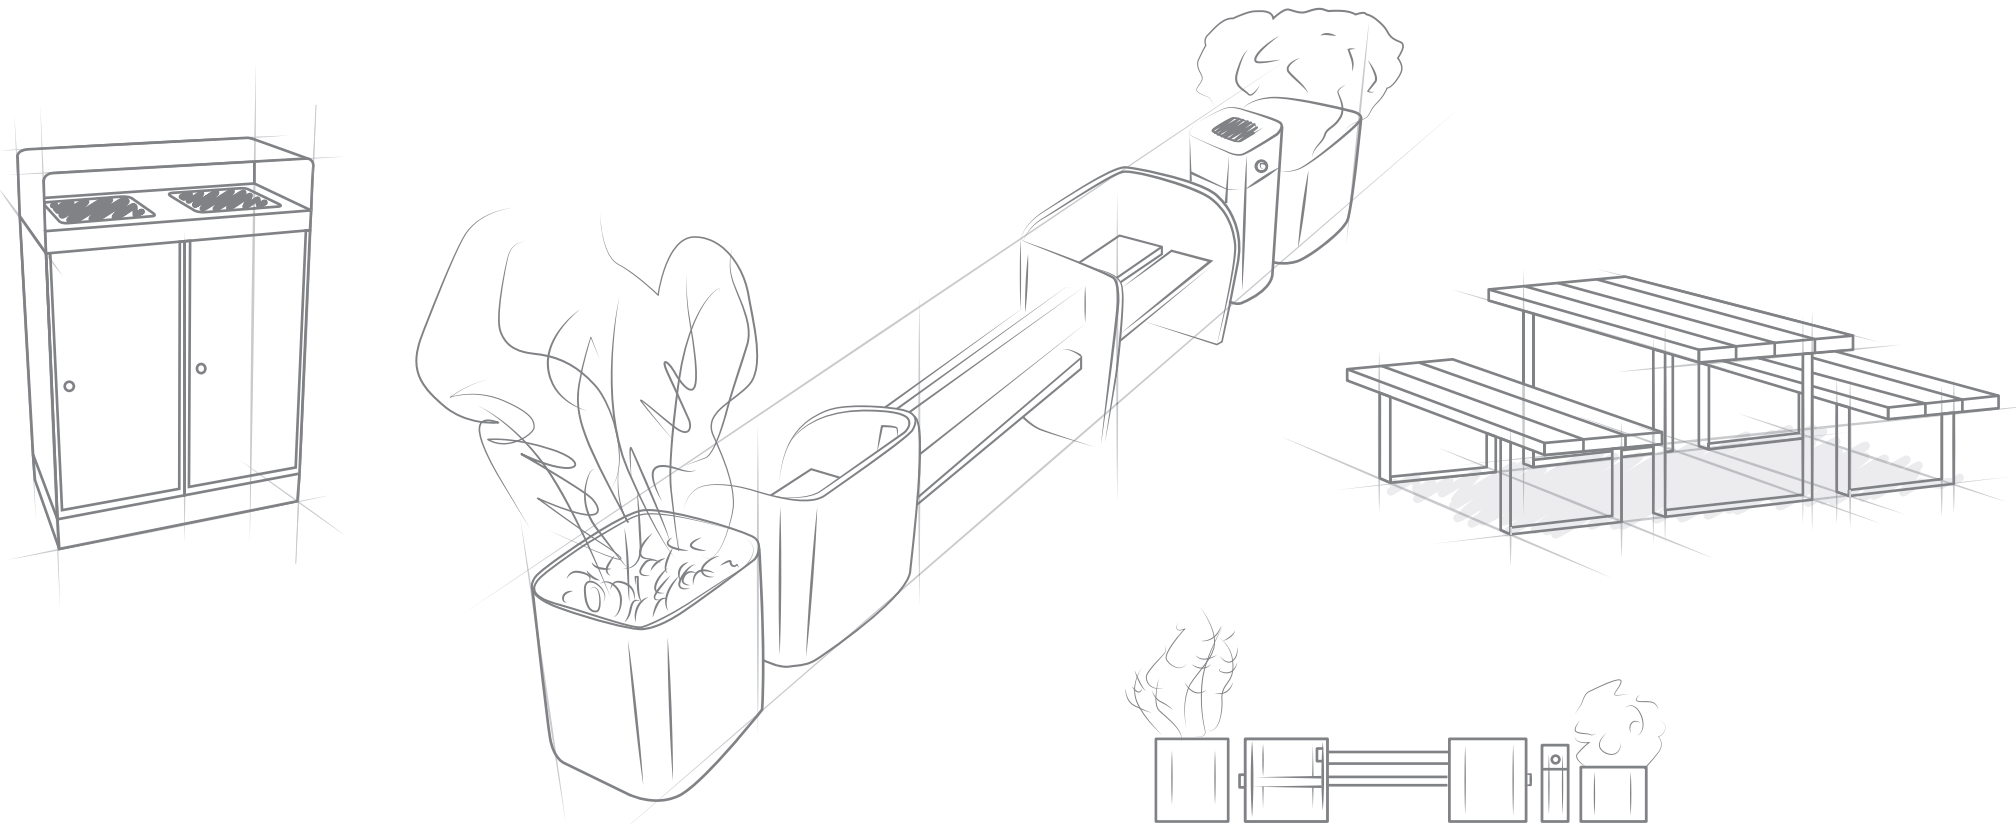

Certified by the Fire Lab Institute. All the bins have passed the test and have obtained the Self-Extinguishing Certificate according to the standards of DIN 31000:2011 and DIN EN ISO 13857:2008.

Check the available bins with a self-extinguishing system in our catalogue. They can be identified by this stamp:

MALLORCA

Colors

- Wooden frame
- Metal doors
- Self-closing flap & tray holder

Wooden recycling cabinet designed for food areas with a large number of users.

For 5 residues. It allows collecting both solid and liquid waste.

The version with liquid waste has a compartment to store cleaning materials.

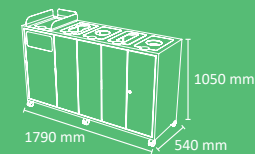

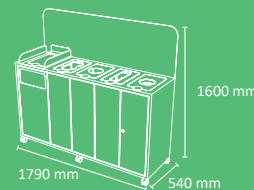

Optional: Additional informative board.

Easy emptying by means of a frontal door

Collecting system: inner ring with an elastic band to hold the bag in place which can be horizontally fold out by guides or metal inner liner with elastic band to keep the bag in place.

Cabinet made of MDF wood and the rest of the components made of galvanized steel.

Check page 112 for specifications.

RECYBATTERIES

Color
transparent

Available in two capacities 3L & 6L
Transparent container.
The 3L version has 2 inner compartments to collect separately button & cylindrical batteries.
Made of plastic.

BIOBIN

Color

Bin with 10L capacity, vented, with hinged lid & ergonomic handle.

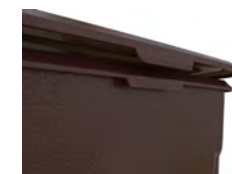

Collection system: Compostable bag (not included).

Vented: The holes in the bin (using a compostable bag), facilitate the transpiration of the liquid contained in the organic residue, (the waste is kept in aerobic conditions during the days in which the bag is filled) so it reduces the accumulation of leachates and bad odours.

With a cleft in the base and ergonomic handle with safety system to help the emptying
Stackable, optimizing transport and storage costs.

Frontal area can be customized by IML (consult conditions and MOQ).

Made in Spain with plástico polypropylene (with more than 15% recycled material) and 100% recyclable.
Check page 112 for specifications.
